€-coin falls further in June

- **€-coin** fell from -0.42 in May to -0.66 in June, the lowest figure since November 2022.
- The decline in the indicator was affected by the worsening confidence of firms, ongoing since March, and by some demand indicators, including new vehicle registrations.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- The next publication dates for €-coin are **Thursday, 3 August 2023** and **Friday 1 September** (to be confirmed).

€-coin and euro-area GDP – June 2023

Source: Bank of Italy and Eurostat.

Note: The €-coin series is based on the real time estimates of the indicator at a given date and hence the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

€-coin is constructed monthly by exploiting a vast set of macroeconomic time series (e.g. industrial production indices, business and household surveys, demand indicators, and stock market indices) in order to extract the data needed to estimate the underlying trend of euro-area GDP growth.

€-coin precedes by several months the official euro-area GDP figure released by Eurostat and gives an early indication of the trend net of any erratic or short-term components.

The following table shows the performance of the €-coin indicator over the last year:

Month	€-COIN
June 2022	0.88
July 2022	0.38
August 2022	0.23
September 2022	-0.73
October 2022	-0.31
November 2022	-0.62
December 2022	-0.23
January 2023	0.06
February 2023	-0.05
March 2023	-0.14
April 2023	-0.15
May 2023	-0.42
June 2023	-0.66
