## €-coin rises marginally in April

- **€-coin** rose for the third consecutive month in April (to 0.26, from 0.15 in March), signalling a pick-up in economic activity in the euro area.
- The indicator benefited from a cyclical recovery in industrial production and from the resilience of demand indicators, while household and business confidence remained weak.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- The next publication dates for **€-coin** are **Monday, 3 June 2024** and **Friday, 28 June 2024** (to be confirmed).

## €-coin and euro-area GDP

*Note:* The €-coin series is based on the real time estimates of the indicator at a given date and hence the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

**€-coin** is constructed monthly by exploiting a vast set of macroeconomic time series (e.g. industrial production indices, business and household surveys, demand indicators, and stock market indices) in order to extract the data needed to estimate the underlying trend of euro-area GDP growth.

**€-coin** precedes by several months the official euro-area GDP figure released by Eurostat and gives an early indication of the trend net of any erratic or short-term components.

**The following table shows the performance of the €-coin indicator over the last year:**

Month	€-COIN
April 2023	-0.15
May 2023	-0.42
June 2023	-0.66
July 2023	-0.56
August 2023	-0.34
September 2023	-0.18
October 2023	-0.67
November 2023	-0.79
