

Comunicato Stampa

DIFFUSO A CURA DEL SERVIZIO SEGRETERIA PARTICOLARE DEL DIRETTORIO E COMUNICAZIONE

30 September 2015

€-coin falls slightly in September

- The €-coin indicator fell slightly in September (to 0.39, from 0.43 in August) for the first time since November 2014 but was still high.
- The decline in the indicator was due mainly to tensions on the financial markets and to the slackening of foreign trade. Industrial activity made a positive contribution.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- Next **€-coin** release dates: **Friday 30 October** and **Friday 27 November** (preliminary).

€-coin and euro-area GDP – September 2015

Sources: Bank of Italy and Eurostat.

€-coin collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant to tracking underlying GDP trends for the entire area.

The **€-coin** estimate is timely, leading Eurostat's official release of the area-wide GDP growth figure by several months. And it provides a reasonably close anticipation of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€-coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

The following table shows the performance of the €-coin indicator over the last year:

Month	€-COIN
September 2014	0.13
October 2014	0.08
November 2014	0.06
December 2014	0.11
January 2015	0.16
February 2015	0.23
March 2015	0.26
April 2015	0.33
May 2015	0.38
June 2015	0.39
July 2015	0.41
August 2015	0.43
September 2015	0.39
