3 November 2016

New increase in €coin in October

- In October, the €coin indicator rose to 0.38 (from 0.34 in September), with a strengthening of the growth trend under way since June.
- This largely reflects the improvement in consumer and business confidence levels, as well as the continuing favourable conditions on the financial markets.
- The **€coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€coin** is published monthly by the Bank of Italy and CEPR.
- Next **€coin** release dates: **Wednesday 30 November** and **Friday 30 December** (preliminary).

€coin and euro-area GDP – October 2016

€coin collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant to tracking underlying GDP trends for the entire area.

The **€coin** estimate is timely, leading Eurostat's official release of the area-wide GDP growth figure by several months. And it provides a reasonably close anticipation of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

The following table shows the performance of the **€coin** indicator over the last year:

Month	€COIN
October 2015	0.36
November 2015	0.37
December 2015	0.45
January 2016	0.48
February 2016	0.47
March 2016	0.34
April 2016	0.28
May 2016	0.26
June 2016	0.29
July 2016	0.31
August 2016	0.32
September 2016	0.34
October 2016	0.38
