29 August 2014

€coin continues to decline in August

- In August the €coin indicator fell to 0.19 from 0.27 in July, continuing the trend that began last spring.
- The decline of the indicator reflects the weakening of economic activity in the second quarter and the recent worsening of consumer and business confidence, although the flattening of the interest rate curve made a slightly positive contribution.
- The **€coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€coin** is published monthly by the Bank of Italy and CEPR.
- Next **€coin** release dates: **Friday 26 September** and **Friday 31 October** (preliminary).

€coin and euro-area GDP – August 2014

Sources: Bank of Italy and Eurostat.

€coin collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant to tracking underlying GDP trends for the entire area.

The **€coin** estimate is timely, leading Eurostat's official release of the area-wide GDP growth figure by several months. And it provides a reasonably close anticipation of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

The following table shows the performance of the €coin indicator over the last year:

Month	€COIN
August 2013	-0.04
September 2013	0.12
October 2013	0.20
November 2013	0.23
December 2013	0.29
January 2014	0.31
February 2014	0.35
March 2014	0.38
April 2014	0.39
May 2014	0.31
June 2014	0.31
July 2014	0.27
August 2014	0.19
