## ***Banks and Financial Institutions: Credit Conditions and Risk by Sector and Geographical Area***

### **Notice to Users**

*Banks and Financial Institutions: Credit Conditions and Risk by Sector and Geographical Area* is one of the three new stand-alone specialized publications which are replacing the *Statistical Bulletin* over the course of 2017. This new report will be published quarterly and contains statistical data on the financial and credit system, in particular on borrower characteristics, credit quality and borrowing terms and conditions (rates and guarantees) disaggregated by sector and geographical area.

A more detailed description of the content of the report and of the sources used is provided in *Banks and Financial Institutions: Credit Conditions and Risk by Sector and Geographical Area*, Bank of Italy, *Statistics*, [Methods and Sources: Methodological Notes](#), 29 September 2017.

The report is composed of 44 tables (15 of which only in the [Statistical Database \(BDS\)](#)) taken from the old *Statistical Bulletin's* Section B – Information on Banking and Financial Business, Sub-Sections B3 and B4, in Section D – Information on Customers and on Risk and in Section E1 – Lending Rates.

In this new publication the titles and codes of the tables in the old *Statistical Bulletin* have been modified and new terminology has been adopted to clarify the main concepts while the content remains unchanged. The definitions have been aligned to those utilized by other statistical publications which describe the same phenomena.

The links between the old and the new terminology as well as the codes and titles of the tables are listed in the [Conversion Chart](#).

## Notice to readers

- I. Symbols:
  - the phenomenon does not exist, or it exists and data are collected but no cases were recorded
  - .... the phenomenon exists but no data are available
  - .. the data are known but the value is below the minimum considered significant
  - == the data are confidential
  - :: the data are not statistically significant
- II. The intervals for the classification by size include the lower limit and exclude the upper limit.
- III. The source must be cited in any use or dissemination of the information contained in the publications. The Bank of Italy is not responsible for any errors of interpretation or mistaken conclusions drawn on the basis of the information published.
- IV. The row and column totals of some tables may not tally with the sum of the entries because they include data that cannot be allocated.
- V. A brief description of the methodology, the main statistical sources and the revisions to methodology concerning the data provided in this report is available in '*Banks and Financial Institutions: Credit Conditions and Risk by Sector and Geographical Area*, Bank of Italy, Statistics, [Methods and Sources: Methodological Notes](#), 29 September 2017.

**Notes:** This table basically corresponds to the previous table TDB30266. Loans covered by concessions are credit exposures that fall into the categories of "Non-performing exposures with forbearance measures" and "Forborne performing exposures" as defined by the EBA's International Technical Standards. The data include transactions with resident and non-resident customers, excluding interbank relations. The data are reported at book value excluding interest for late payment. Non-performing loans do not include securities classified as held for trading, these are instead included in the loans (performing) not subject to forbearance.

**Notes:** This table basically corresponds to the previous table TDB30921. Only lending in euros to resident customers is considered, excluding Monetary Financial Institutions. The rates are calculated as the weighted average of the actual rates charged to customers, excluding transactions at subsidized interest rates (for further information see: "Methods and Sources: Methodological Notes").
