The Public Finances

New series

Volume XII Number 49 - 10 September 2002

NOTICE TO READERS

The statistics on the borrowing requirement and debt for 2001 contained in this Supplement take account of Eurostat's decision of 3 July 2002 concerning the accounting treatment of securitization receipts. On the contrary, the figures for 2002 do not take account of the effects of that decision. According to a Ministry for the Economy and Finance press release of 24 July 2002, the consequent improvement in the borrowing requirement in the first half of 2002 is estimated to have been €1,650 million, of which €1,215 million in respect of disposals of buildings and €435 million in respect of lottery receipts.

GENERAL INFORMATION

- I - Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II - Symbols and Conventions:
- the phenomenon in question does not occur;
 - the phenomenon occurs but its value is not known;
 - .. the value is known but is nil or less than half the final digit shown.
- Figures in parentheses in roman type () are provisional, those in parentheses in italics () are estimated.
- III - The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the database in the electronic archive in which information to be released to the public is held. A similar code identifies the different aggregates shown in each table.
- IV - The methodological notes in the last part of the Supplement are identified by electronic codes that refer to the tables and, within each table, to the individual aggregates. Notes that refer to a single observation are also identified by the date of that observation.

As of the January 2002 edition of this Supplement, in conjunction with the start of the circulation of the euro most of the tables previously published in lire will be eliminated. However, to help the public to adapt to the new currency, the most important aggregates will continue to be shown in both euros and lire until the end of 2002.

For the period preceding the introduction of the euro (1 January 1999), the amounts shown in euros have been obtained from those in lire by applying a fixed conversion rate equal to the irrevocable lira/euro exchange rate in force since 1999 (1,936.27 lire for 1 euro). Accordingly amounts shown in "euros" for this period are to be understood as amounts in "lire" converted at the irrevocable exchange rate.

METHODOLOGICAL APPENDIX

GENERAL INDICATIONS

N.B. The statistics on the borrowing requirement and debt for 2001 contained in this Supplement take account of Eurostat's decision of 3 July 2002 concerning the accounting treatment of securitization receipts. On the contrary, the figures for 2002 do not take account of the effects of that decision. According to a Ministry for the Economy and Finance press release of 24 July 2002, the consequent improvement in the borrowing requirement in the first half of 2002 is estimated to have been 1,650 millions of euros, of which 1,215 millions in respect of disposals of buildings and 435 millions in respect of lottery receipts.

This Supplement contains data on the formation and financing of the borrowing requirement and debt of general government (disaggregated into central government, local government and social security institutions). The state sector borrowing requirement net of settlements of past debts and extraordinary receipts, deriving primarily from privatizations, is shown as a memorandum item. The data on state sector settlements of past debts and extraordinary receipts are used to provide an estimate of the general government borrowing requirement net of these transactions. The central government borrowing requirement includes the sector's transactions with all the other general government bodies; accordingly the borrowing requirements of local government and social security institutions refer exclusively to their funding needs net of central government transfers. The state sector and central government include basically the same entities; the differences between their borrowing requirements as reported here are due to the different accounting rules used to allocate financial liabilities among the various components of general government. On the formation side, the borrowing requirement is determined as the balance, on a cash basis, of current and capital revenue and expenditure and financial items (except for the changes in the credit balances on the Treasury's accounts with the central bank). On the financing side, the borrowing requirement is determined as the balance of the change in financial liabilities and that in the assets held by the Treasury with the central bank. Gross general government debt is given by the sector's financial liabilities at their face value at issue (the definition adopted for the Monetary Union's excessive deficit procedure). The borrowing requirement of a sector does not coincide with the change in its debt, not only because of the different accounting treatments of the assets held by the Treasury with the central bank but also because of the differences between the accounting rules used in determining the two aggregates. In particular, it should be noted that: a) government securities, except for BOTs, are included net of issue discounts and placement commissions in the borrowing requirement but at face value in the debt; and b) foreign currency securities are translated into lire at the exchange rate obtaining at the date of issue in the borrowing requirement but at that obtaining at the end of the reference period in the debt. The stock and flow data both exclude general government liabilities taken up by other general government public bodies. Since accounts showing the formation of the general government borrowing requirement are not prepared on a monthly basis, the data shown here refer to the balance of the state budget. The balance of the other central government operations reported in the table on the formation of the general government borrowing requirement is therefore obtained as the difference between the central government borrowing requirement, determined on the financing side, and the state budget balance. On the financing side, the borrowing requirement is analyzed by financial instrument and by general government subsector. The analysis of the debt is by financial instrument, holding sector and general government subsector. In this connection it is worth noting that, since the public bodies included in central government and the state sector are basically the same, neither their borrowing requirements nor their debts differ significantly, apart from the effects of the different accounting rules used to allocate financial liabilities. The series shown here for central government debt is calculated using similar methods to those used to calculate the sector's borrowing requirement. As of issue no. 31 of 6 June 2001, the criterion used to attribute bank loans to the subsectors of general government has been changed. Such loans are now classified among the liabilities of the subsector responsible for repaying them; previously they were attributed to the subsector of the entity that received the financing.

NOTES TO THE TABLES

The order of the tables in the following notes is based on their code numbers. The notes to each table are set out below, together with references to the “Notes to the classification variables” section where appropriate.

TCCE0100 – FORMATION OF THE GENERAL GOVERNMENT BORROWING REQUIREMENT

S070207M – CENTRAL GOVERNMENT: BALANCE OF THE CHANGES IN TREASURY ACCOUNTS AND OTHER TRANSACTIONS (DEFICIT: –)

The difference between the state budget balance and the central government borrowing requirement based on financing data. The series consists primarily of the difference between payments made to the Treasury by the state budget and other entities and those made by the Treasury to non-state entities.

S072090M – STATE BUDGET: BALANCE BETWEEN REVENUE AND EXPENDITURE (DEFICIT: –)

As of May 1998, following the introduction of the unified tax payment form (Legislative Decree 241/1997) and the single mandate procedure (Ministerial Decree 183/1998), the balance is affected by leads and lags in the recording of items, especially tax refunds.

S428475M – STATE BUDGET: TAX REVENUE

The revenues shown in this table do not correspond to the taxes actually paid. The monthly flows are observed with reference to the time receipts are entered in the state budget, which, since May 1998, has not been the same as the time they are paid. In fact, following the introduction of the unified tax payment form (Legislative Decree 241/1997) and the single mandate procedure (Ministerial Decree 183/1998), as of May 1998, the main central government taxes are paid to the Treasury (and entered in the so-called “Tax collection accounts”) and only allocated to the various items of the state budget some time afterwards. The amounts are shown net of accounting transactions with the Sicily and Sardinia regions but include tax refunds and the VAT accruing to the European Union. As of 1996, receipts of petrol duty used to finance the ordinary statute regions are excluded.

S835207M – CENTRAL GOVERNMENT: GROSS BORROWING REQUIREMENT (DEFICIT: –)

Based on financing data.

S857863M – TAX COLLECTION ACCOUNTS

This item shows the balance of the changes in state taxes, Irap due to the regions and social security contributions due to INPS paid using the single mandate procedure and recorded in “Tax collection accounts” pending allocation to the accounts of respectively the state budget, the regions and INPS. A negative value for the “Tax collection accounts” indicates that the total amount allocated during the month exceeded the taxes and contributions actually collected and vice versa.

S888011M – LOCAL GOVERNMENT: BORROWING REQUIREMENT AFTER CONSOLIDATION (DEFICIT: –)

Based on financing data. The series shows local government’s funding needs on a cash basis after deducting the sector’s own revenues and transfers from other public bodies.

S900166M – SOCIAL SECURITY INSTITUTIONS: BORROWING REQUIREMENT AFTER CONSOLIDATION (DEFICIT: –)

Based on financing data. The series shows social security institutions funding needs on a cash basis after deducting their own revenues and transfers from other public bodies.

S916545M – PRIVATIZATION RECEIPTS AND OTHER EXTRAORDINARY STATE SECTOR REVENUE

In addition to receipts deriving from the privatization of public enterprises (net of any repurchases), the series includes some items of extraordinary revenue, such as receipts in connection with the liquidation of enterprises and the proceeds of the sale of UMTS licences.

S926208M – STATE SECTOR: BORROWING REQUIREMENT NET OF SETTLEMENTS OF PAST DEBTS AND PRIVATIZATION RECEIPTS (DEFICIT: –)

Based on Ministry of the Economy and Finance data.

S994979M – GENERAL GOVERNMENT: BORROWING REQUIREMENT NET OF SETTLEMENTS OF PAST DEBTS AND PRIVATIZATION RECEIPTS (DEFICIT: –)

Excludes settlements and privatizations effected by entities not belonging to the state sector.

TCCE0110 – FINANCING OF THE GENERAL GOVERNMENT BORROWING REQUIREMENT: BY INSTRUMENT

S151658M – GENERAL GOVERNMENT: SHORT-TERM SECURITIES – NET ISSUES

Consisting mainly of BOTs. The series excludes the net subscriptions of general government bodies. Foreign currency issues and redemptions are translated into lire at the exchange rates obtaining at the time of the issues/redemptions.

S189357M – GENERAL GOVERNMENT: MEDIUM AND LONG-TERM SECURITIES – NET ISSUES

Consisting mainly of BTPs, CCTs and CTZs. Gross issues are valued net of issue discounts and placement commissions and redemptions at redemption value. The series excludes the net subscriptions of general government bodies. Foreign currency issues and redemptions are translated into lire at the exchange rates obtaining at the time of the issues/redemptions. The series includes the securities issued to consolidate past debts of public bodies, those issued in December 1993 to establish the Treasury payments account at the Bank of Italy pursuant to Law 483/ 1993 (net proceeds, 30,670 billion lire) and those issued in November 1994 to consolidate the suspense account referred to in the Ministerial Decree of 15.11.1994 (76,206 billion lire). It also includes the medium and long-term securities issued by the former autonomous government agencies whose cost is borne by the state.

S482529M – TREASURY CURRENT ACCOUNTS WITH THE BANK OF ITALY – CHANGES

Primarily the former Treasury current account, the suspense account and the Treasury payments account established pursuant to Law 483/1993, and the sinking fund for the redemption of government securities set up under Law 432/1993 (subsequently amended by Decree Law 432/1994, which was reiterated several times and finally ratified as Law 11/1996). The treasury current account was closed on 31 December 1993 and the overdraft at that date transferred to the suspense account. The latter was closed in November 1994 following the consolidation of the debt by way of the assignment to the Bank of Italy of 76,206 billion lire of BTPs issued under the Ministerial Decree of 15.11.1994.

S670425M – GENERAL GOVERNMENT: NET DISBURSEMENTS OF LOANS BY NON-RESIDENT BANKS

Disbursements and redemptions of foreign currency loans are translated at the exchange rates obtaining at the time of the disbursements/redemptions.

S674752M – GENERAL GOVERNMENT: BANK OF ITALY FINANCING OTHER THAN PURCHASES OF SECURITIES AND OTHER MINOR OPERATIONS

The series consists mainly of transactions with the Bank of Italy other than the purchase of securities (above all the changes in the Treasury's current account balances) and state notes and coins in circulation.

S694052M – GENERAL GOVERNMENT: NET ISSUES ABROAD OF SHORT-TERM SECURITIES

Mainly net issues of commercial paper.

S725861M – GENERAL GOVERNMENT: NET ISSUES ABROAD OF MEDIUM AND LONG-TERM SECURITIES

Issues are valued net of issue discounts and placement commissions and redemptions at redemption value. The series includes Treasury certificates in ecus (CTEs) stamped as being for circulation abroad and debt issued abroad by the former autonomous government agencies whose cost is borne by the state.

S945371M – CHANGES IN THE DEBTS OF OTHER BODIES WHOSE COST IS BORNE BY THE STATE

Consisting mainly of debts of the railways.

TCCE0120 – FINANCING OF THE GENERAL GOVERNMENT BORROWING REQUIREMENT: BY SUBSECTOR

S008424M – CENTRAL GOVERNMENT: NET DISBURSEMENTS OF LOANS BY BANKS

The series refers to both resident and non-resident banks.

S047996M – LOCAL GOVERNMENT: NET DISBURSEMENTS OF LOANS BY BANKS

The series refers to both resident and non-resident banks.

S855825M – LOCAL GOVERNMENT: FINANCING OF THE BORROWING REQUIREMENT AFTER CONSOLIDATION

The series shows local government's funding needs on a cash basis after deducting the sector's own revenues and transfers from other public bodies.
