Notice to readers

This Supplement to the Statistical Bulletin publishes the data on Italy's borrowing requirement and general government debt as revised on the occasion of Italy's 1 April 2014 notification to the European Commission as part of the excessive deficit procedure. The revisions with respect to the data published in Supplement 16/2014 on 14 March are insignificant, reflecting the usual updating of sources.

In addition, the data in Table 5 (General government debt: by holding sector) have been revised to take account of a new, more precise classification of the securities posted as collateral for repurchase operations executed through resident central counterparties. The changes, detailed in the table below, resulted in a reduction of the portion of the debt held by non-residents and an increase in that held by "Other residents". They did not affect the total debt. A more detailed account of the reasons for the reclassification will be given in the Supplement to the Statistical Bulletin Balance of Payments and International Investment Position, scheduled for publication on 23 April.

(1) The revenues shown in this table do not correspond to the taxes actually paid. The monthly flows are observed with reference to the time receipts are entered in the state budget, which, since May 1998, and allocated to the various items of the state budget only some time afterwards. - (2) The flows shown under this heading refer to the changes in the balance of the "Tax collection accounts". METHODOLOGICAL APPENDIX

GENERAL INDICATIONS

This publication contains figures on the borrowing requirement and debt of general government and its subsectors (central government, local government and social security institutions).

The borrowing requirement does not coincide with the change in the debt mainly owing to the different ways in which general government deposits held with the Bank of Italy and Treasury liquidity investments are treated; in fact the borrowing requirement is obtained as the change in the debt net of Treasury's liquid balances. The borrowing requirement and the debt also differ as a consequence of the different accounting standards applied in calculating the two aggregates. In particular: a) in the borrowing requirement issues of securities apart from BOTs are valued net of issue discounts and placement commissions, whereas they are included in the debt at nominal value; and b) in the borrowing requirement liabilities denominated in foreign currencies are converted using the exchange rate obtaining at the transaction settlement date, whereas in the debt they are converted using the end-of-period exchange rate. The formation of the central government borrowing requirement includes transactions with other general government entities; consequently, the borrowing requirements of local government and the social security institutions corresponds exclusively to their additional financing needs with respect to those met by state transfers.

General government debt consists of all the sector's financial liabilities valued at their face value at issue. It is consolidated between and within the subsectors. In other words it excludes liabilities that are assets, consisting of the same instruments, of entities belonging to general government, in line with the definition adopted for the European Economic and Monetary Union's excessive deficit procedure. The aggregate is calculated according to the methodological criteria established in European Council Regulation no. 479/2009 by summing the following categories of financial liabilities: currency and deposits; non-equity securities and loans. Loans from monetary financial institutions are allocated to the general government subsector the final borrower belongs to, i.e. that of the entity required to repay the loan and not that of the entity to which it is disbursed.

Table TCCE0100 shows the formation of the general government borrowing requirement. It is calculated as the balance on a cash basis of current and capital items and those of a financial nature (except for changes in cash balances, which in the case of general government are conventionally taken to correspond to the changes in the deposits held with the Bank of Italy). In the absence of monthly figures on the formation of the general government borrowing requirement, the data shown here are restricted to an analysis of the formation of the state budget balance. The balance of the central government's other transactions is thus obtained as the difference between the central government borrowing requirement calculated on the financing side and the balance of the state budget. As a memorandum item the table shows the unconsolidated central government borrowing requirement net of settlements of past debts and extraordinary revenue arising primarily in connection with privatizations.

Table TCCE0125 shows a breakdown of the general government borrowing requirement by instrument (the financing of the borrowing requirement).

Table TCCE0155 shows the breakdown of the general government borrowing requirement by subsector.

Table TCCE0175 shows the breakdown of general government debt by instrument along the same lines as for the borrowing requirement. Securities are divided by maturity, with an indication of the variable rate component. The share of foreign currency debt is also shown.

Table TCCE0200 shows the distribution of general government debt among the following holding sectors: Bank of Italy, other monetary financial institutions, other residents and non-residents.

Table TCCE0225 shows the distribution of general government debt among the different subsectors. Both the unconsolidated and the consolidated debt of each sector are reported.

Tables TCCE0250 and TCCE0275 cover local government debt. They analyze the debt by subsector (regions and autonomous provinces, provinces, municipalities and other entities) and instrument and by geographical area.

Table TCCE0300 shows general government debt together with the deposits this sector holds with resident monetary financial institutions and the Bank of Italy net of Treasury liquidity investments, and loans granted to countries belonging to the Monetary Union both bilaterally and via the European Financial Stability Facility. The table also shows the debt net of Treasury's liquid balances.

Table TCCE0325 shows the breakdown of general government debt by residual maturity, with an indication of the variable rate component; the average residual maturity of the debt is also shown (in years).

Tables TCCE0350 and TCCE0375 show, for general government and central government respectively, the breakdown of debt by instrument and residual maturity, currency, holders' residence.

As of September 2006 Cassa Depositi e Prestiti s.p.a. is included among Monetary Financial Institutions and the loans it disburses to general government, previously included in the series "Other transactions" and "Other liabilities" are now included in the series "MFI loans". At the same time the breakdown by holding subsector is adjusted in accordance with the new classification.

The reconstruction of general government debt since the unification of Italy was completed in 2008. The data are updated monthly on the occasion of the publication of this Supplement and are available in the Statistics section of the Bank of Italy's website

NOTES TO THE TABLES

The order of the tables in the following notes is based on their code numbers. The notes to each table are set out below, together with references to the "Notes to the classification variables" section where appropriate.

TCCE0100 - Formation of the general government borrowing requirement

S994979M - General Government: borrowing requirement net of settlements of past debts and privatization receipts

Excludes settlements and privatizations effected by entities belonging to the central government. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S857863M - Tax collection accounts

The amounts shown under this heading are the changes in the balance of taxes paid to the Treasury using the single mandate procedure and waiting to be allocated, with reference to central government taxes, Irap due to the regions and social security contributions due to INPS. A negative value indicates that the total amount allocated during the month exceeded the taxes and contributions actually paid to the Treasury and vice versa.

S916545M - Privatization receipts and other extraordinary revenue

The series includes receipts deriving from the privatization of public enterprises (net of any repurchases) and some items of extraordinary revenue, such as receipts in connection with the liquidation of enterprises and the proceeds of the sale of UMTS licences. It also includes proceeds from the reimbursement of the financial instruments issued by banks and subscribed by the Ministry of the Economy and Finance in the context of the measures to support the financial system (Law 2/2009).

S835207M - Central Government: gross borrowing requirement (deficit: -)

Based on financing data. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S926208M - Central Government: unconsolidated borrowing requirement net of settlements of past debts and privatization receipts

The unconsolidated borrowing requirement includes liabilities towards general government bodies outside central government. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S070207M - Central Government: balance of the changes in treasury accounts and other transactions (deficit: -)

The difference between the state budget balance and the central government borrowing requirement based on financing data. The series consists primarily of the difference between payments made to the Treasury by the state budget and other entities and those made by the Treasury to non-state entities. As of December 2003 includes the deposits of the Cassa Depositi e Prestiti with the Treasury and the funds raised by the Post Office assigned to the Treasury.

S888011M - Local Government: additional gross borrowing requirement after consolidation (deficit: -)

Based on financing data. The series shows local government's funding needs on a cash basis after deducting the sector's own revenues and transfers from other public bodies. As of December 2003 includes the loans of the Cassa Depositi e Prestiti to local authorities, net of the part of the specific-purpose loans not yet disbursed by Cassa Depositi e Prestiti S.p.A. and included in the deposits in the supervisory

reports.

S900166M - Social security institutions: additional gross borrowing requirement after consolidation (deficit: -)

Based on financing data. The series shows social security institutions funding needs on a cash basis after deducting their own revenues and transfers from other public bodies.

S428475M - State budget: tax revenue

Tax revenue refers to the amounts allocated each month to the relevant chapters of the state budget. It should be noted that as of 1998, with the introduction of the unified tax payment form and the single mandate procedure, the time taxes are paid to the Treasury is not the same as the time they are allocated; in some cases amounts may be paid in one month and allocated in another. Tax revenue is not adjusted for tax refunds (included in the budget under payments) and includes VAT accruing to the European Union. The monthly figures are consistent with those published by the Ministry for the Economy and Finance in Conto riassuntivo del Tesoro, except that they are net of accounting transactions with the following regions: Sicily, Sardinia and, since 2009, Friuli Venezia Giulia.

TCCE0125 - Financing of the general government borrowing requirement: by instrument

S129640M - Central Government: currency and deposits (liabilities) in domestic currency - changes

Post Office funds, coins in circulation and deposits held with the Treasury by entities outside general government. As of December 2003, following the exclusion of Cassa Depositi e Prestiti from general government, Post Office funds include only the part pertaining to Ministry for the Economy and Finance. This comprises ordinary and fixed-term post office savings certificates, and Post Office current accounts. Following the decisions of Eurostat announced on 23 May 2005, the series includes the prepayments of taxes by tax collection agencies (Decree Law 341/2003 ratified by Law 31/2004 and Decree Law 282/2004 ratified by Law 307/2004). (ESA95: Sector S13, Instrument F2)

S492133M - General Government: investments of liquid assets - changes

The amounts generated by OPTES operations involving Treasury liquidity investments with the banking system under the new system for managing the Treasury's liquidity on deposit with the Bank of Italy (Ministry Decree 25391 of 25 October 2011). These operations are carried out by way of

auctions or bilateral negotiation.

S191484M - General Government: deposits held with Bank of Italy and investments of liquid assets - changes

Include il Conto disponibilità del Tesoro per i servizi di tesoreria (L. 26/11/93, n. 483 e DM 19/9/05), il Fondo per l'ammortamento di titoli di Stato (L. 27/10/93, n. 432, modificata dal DL 8/7/94, n. 436, più volte reiterato e convertito con la L. 6/3/96, n. 110), altri depositi vincolati a scadenza predeterminata, le operazioni OPTES riguardanti impieghi della liquidità del Tesoro presso il sistema bancario (Decreto del Ministro dell'Economia e delle Finanze n.25391 del 25 ottobre 2011) e, sino al novembre 1994, il Conto corrente per il servizio di tesoreria provinciale e il Conto transitorio (L. 26/11/93, n. 483).

S173286M - General Government:post office funds - changes

As of December 2003, following the exclusion of Cassa Depositi e Prestiti from general government, Post Office funds include only the part pertaining to Ministry for the Economy and Finance. This comprises ordinary and fixed-term post office savings certificates, and Post Office current accounts.

S151658M - General Government:short-term securities - net issues

Net issues of securities with an initial maturity equal to or less than one year made by general government and not subscribed by general government entities. Gross issues are valued net of issue discounts and placement commissions, except for BOTs, which are included at nominal value; redemptions are included at nominal value, except for commercial paper for which the principal amount is included. For securities denominated in foreign currencies, the conversion is made using the exchange rate obtaining on the issue/redemption date. Account is also taken of swaps. (ESA95: Sector S13, Instrument F331)

S189357M - General Government:medium and long-term securities - net issues

Net issues of securities with an initial maturity of more than one year made by general government and not subscribed by general government entities. Gross issues are valued net of issue discounts and placement commissions; redemptions are included at nominal value, except for CTZs, for which the principal amount is included. For securities denominated in foreign currencies, the conversion is made using the exchange rate obtaining on the issue/redemption date. Account is also taken of swaps. The series also includes

securities issued for the settlement of past debts, those issued by former autonomous government agencies to be redeemed by the state, those issued in December 1993 to establish the Treasury payments account at the Bank of Italy pursuant to Law 483/1993 and those issued in November 1994 to consolidate the suspense account referred to in the Ministerial Decree of 15.11.1994 (76.206 trillion lire); the latter securities, initially held in the Bank of Italy's portfolio, were the subject of a bond conversion transaction in December 2002. Following the decisions of Eurostat announced on 23 May 2005, the series includes securities issued by Infrastrutture S.p.A. to finance the construction of high-speed railway infrastructure. (ESA95: Sector S13, Instrument F332)

S767399M - General Government: other financing - changes

The change in deposits held with the Bank of Italy and the proceeds of securitizations for the part considered to be loans according to the criteria established by Eurostat. As of December 2003, following the exclusion of Cassa depositi e prestiti S.p.A. from general government, up to August 2006, the series includes the loans disbursed by Cassa depositi e prestiti S.p.A. to general government. The series also includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility and following Eurostat's decision of 31 July 2012, as of December 1997, the series includes assignments without recourse to non-bank financial intermediaries.

S848329M - General Government: net disbursements of loans by other monetary financial institutions

Disbursements of loans to general government by resident monetary financial institutions, the European Investment Bank and, as of September 2006, Cassa Depositi e Prestiti S.p.A.. Loans denominated in foreign currencies are converted using the exchange rate obtaining on the transaction settlement date. Following the decisions of Eurostat announced on 23 May 2005, the series includes loans raised by Infrastrutture S.p.A. to finance the construction of high-speed railway infrastructure, net of the part of the specific-purpose loans not yet disbursed by Cassa Depositi e Prestiti S.p.A. and included in the deposits in the supervisory reports. (ESA95: Sector S13, Instrument F4)

S029605M - General Government: financing of the gross borrowing requirement

Balance of the change in general government liabilities, excluding those that are assets of general government

entities, and the change in deposits held with the Bank of Italy and Treasury liquidity investments. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S969486M - General Government: transactions in debt instruments

The change in general government financial liabilities.

TCCE0155 - Financing of the general government borrowing requirement: by subsector

S029605M - General Government: financing of the gross borrowing requirement

Balance of the change in general government liabilities, excluding those that are assets of general government entities, and the change in deposits held with the Bank of Italy and Treasury liquidity investments. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S344502M - General Government: gross borrowing requirement financing abroad

Change in liabilities financed abroad (net issues in foreign financial centres and net disbursements of loans by non-resident institutions). The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S112869M - Central Government: securities - net issues

Net issues of securities made by central government and not subscribed by general government entities. Gross issues are valued net of issue discounts and placement commissions, except for BOTs, which are included at nominal value; redemptions are included at nominal value, except for commercial paper and CTZs, for which the principal amount is included. For securities denominated in foreign currencies, the conversion is made using the exchange rate obtaining on the issue/redemption date. Account is also taken of swaps. The series also includes securities issued for the settlement of past debts, those issued by former autonomous government agencies to be redeemed by the state, those issued in December 1993 to establish the Treasury payments account at the Bank of Italy pursuant to Law 483/1993 and those issued in November 1994 to consolidate the suspense account referred to in the Ministerial Decree of 15.11.1994 (76.206 trillion lire); the

latter securities, initially held in the Bank of Italy's portfolio, were the subject of a bond conversion transaction in December 2002. Following the decisions of Eurostat announced on 23 May 2005, the series includes securities issued by Infrastrutture S.p.A. to finance the construction of high-speed railway infrastructure. (ESA95: Sector S1311, Instrument F33)

S008424M - Central Government: net disbursements of loans by other monetary financial institutions

Net disbursements of loans by resident monetary financial institutions, the European Investment Bank and, as of September 2006, Cassa Depositi e Prestiti S.p.A. to be redeemed by central government. Loans denominated in foreign currencies are converted using the exchange rate obtaining on the transaction settlement date. Following the decisions of Eurostat announced on 23 May 2005, the series includes loans raised by Infrastrutture S.p.A. to finance the construction of high-speed railway infrastructure, net of the part of the specific-purpose loans not yet disbursed by Cassa Depositi e Prestiti S.p.A. and included in the deposits in the supervisory reports. (ESA95: Sector S1311, Instrument F4).

S794710M - Central Government: financing of the gross borrowing requirement

Balance of the change in central government liabilities, excluding those that are assets of general government entities, and the change in deposits held with the Bank of Italy. State transfers to other general government entities contribute to the formation of the central government borrowing requirement. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

S173815M - Local Government: securities - net issues

Net issues of securities made by local government and not subscribed by general government entities.
