

**Corporate governance in Italy:
10 years after the Consolidated Law on Finance (TUF)**

11 December 2008

The introduction of the Testo Unico della Finanza in 1998 marked the beginning of an intense reform program aimed at increasing the efficiency and competitiveness of Italian companies: reforms included the introduction of a corporate governance code, a new company law and a law on savings. Ten years on, the conference will analyse developments in the Italian institutional framework, evaluate its effects on the ownership and control structure of Italian companies and banks, and discuss what remains to be done in the field of investor protection.

L'introduzione del Testo Unico della Finanza nel 1998 ha segnato l'inizio di un intenso programma di riforme volto ad accrescere l'efficienza e la competitività delle società italiane: tra le riforme figurano l'introduzione di un codice di corporate governance, il nuovo diritto societario, la legge sul risparmio. 10 anni dopo, la conferenza intende analizzare gli sviluppi nel quadro istituzionale, valutarne gli effetti sulla struttura proprietaria e di controllo delle imprese e delle banche italiane, discutere di quali siano gli eventuali ulteriori interventi necessari nel campo della tutela degli investitori.

9.00 – **Opening:** Governor M. Draghi
