

### **Annual average exchange rates 2017**

On 4 January 2018, in connection with a change in the calculation procedure, the annual average rates for 2017 were published as averages of monthly average rates. As of 1 February 2018, these values are replaced by rates calculated as an annual average of daily rates, in continuity with what was done in the past.

For completeness, the values calculated as averages of monthly data are available at the following [link](#).
