Call for Proposals 2022

# Milano Hub - Call for Proposals 2022

*'Application of Distributed Ledger Technology (DLT) to banking, financial, insurance and payment services, with special regard to ensuring: governance reliability and compliance with the applicable provisions and guidelines expressed by the Authorities; robust settlement mechanisms with particular regard to solutions capable of ensuring the final settlement of payments in central bank money; interoperability with other DLT platforms or platforms based on alternative models (e.g. API); certainty and security of operations from a technical and legal standpoint (for example, in terms of transaction finality); and consumer protection.'*

The application window opened from **15 December 2022** to **31 January 2023** as described on the web site <https://www.bancaditalia.it/focus/milano-hub/index.html>.

The increasing uptake of distributed ledger technology (DLT) solution represents a challenging playing field both for operators of financial market who are developing innovative products and for the Authorities which must guarantee governance, transparency and accountability.

There are several interesting use-cases of this technical solution: from the application to smart contracts to the Know Your Customer (KYC), from Anti Money Laundering (AML) safeguards to the payments regulation solutions.

The Call for Proposals aims at supporting projects related to innovative solutions based on DLT technologies, by disseminating best practices among operators to promote the stability of the financial sector and the customer protection.

## OPERATIONAL AREAS

**Fintech Hub**, dedicated to firms which offer digital solutions to innovate financial, banking and insurance services through new technologies and new approaches.

**Innovation Hub**, dedicated to support and development of projects proposed by banking, financial and insurance intermediaries

**R&D Hub**, dedicated to initiatives of research and collaboration with universities, research institutes, institutions and centres of excellence
