Compliance with European Banking Authority (EBA) Guidelines on supervisory reporting and disclosure requirements in compliance with the CRR 'quick fix' in response to the COVID-19 pandemic

On 27 January 2021 the Governing Council did not object to proposals by the Supervisory Board to notify the EBA that, for the significant institutions under its direct supervision, the ECB complies with: (a) EBA Guidelines on supervisory reporting and disclosure requirements in compliance with the CRR 'quick fix' in response to the COVID-19 pandemic (EBA/GL/2020/11), and (b) Guidelines amending Guidelines EBA/GL/2018/01 on uniform disclosures under Article 473a of Regulation (EU) No 575/2013 (CRR) on the transitional period for mitigating the impact of the introduction of IFRS 9 on own funds to ensure compliance with the CRR 'quick fix' in response to the COVID-19 pandemic (EBA/GL/2020/12). The CRR quick fix is part of a series of measures taken by European institutions to mitigate the impact of the coronavirus (COVID-19) pandemic on institutions across EU Member States. In addition to the flexibility already provided in the existing rules, it introduces certain adjustments to the Capital Requirements Regulation (CRR), including temporary measures intended to, among other things, enhance credit flows to companies and households, thereby supporting the EU economy.

wave of the COVID-19 pandemic and the resulting economic restrictions in several EU Member states, the EBA decided to reactivate the Guidelines on moratoria by introducing a new deadline for the application of moratoria of 31 March 2021, replacing the previous date of 30 September 2020.

Compliance with EBA Guidelines on the specification and disclosure of systemic importance indicators

On 8 February 2021 the Governing Council did not object to a proposal by the Supervisory Board to notify the EBA that, for the significant institutions under its direct supervision, the ECB complies with the EBA Guidelines on the specification and disclosure of systemic importance indicators (EBA/GL/2020/14). The Guidelines specify the data and indicators to be used in the assessment exercise to identify global systemically important institutions (G-SIIs), starting with the 2021 exercise based on end-2020 information. The EBA methodology for identifying G-SIIs closely follows the approach of the Basel Committee on Banking Supervision (BCBS) for identifying global systemically important banks (G-SIBs, in BCBS terminology) as well as the new requirements laid down in the fifth EU Capital Requirements Directive (CRD V).
