# Consolidated financial statement of the Eurosystem as at 30 June 2023

In the week ending 30 June 2023 the decrease of EUR 23.5 billion in **gold and gold receivables** (asset item 1) primarily reflected quarterly revaluation adjustments.

The net position of the Eurosystem in foreign currency (asset items 2 and 3 minus liability items 7, 8 and 9) fell by EUR 2.6 billion to EUR 312.5 billion. This change was due to the negative effects of the quarterly revaluation of assets and liabilities of EUR 3.1 billion, which more than offset an increase of EUR 0.5 billion on account of customer and portfolio transactions.

The net balance of open market operations and standing facilities (asset item 5 minus liability items 2.2, 2.3, 2.4, 2.5 and 4) increased by EUR 42.4 billion to EUR -2,960.1 billion. This was due primarily to the change in the level of the **deposit facility** (liability item 2.2) and the **longer-term refinancing operations** (asset item 5.2).

Claims on non-euro area residents denominated in euro (asset item 4) increased by EUR 1.9 billion to EUR 15.8 billion, mainly owing to Eurosystem operations providing euro liquidity to non-euro area central banks. Further details can be found on the ECB's website under "Central bank liquidity lines".

Base money (liability items 1, 2.1 and 2.2) decreased by EUR 536.1 billion to EUR 5,317.4 billion.

The table below provides the detailed breakdown of **securities held for monetary policy purposes** (asset item 7.1) into the different portfolios. All portfolios are accounted for at amortised cost.

These are expected to be infrequent and would result from sales of securities conducted, for instance, for risk management purposes.

#### Quarter-end revaluation of the Eurosystem's assets and liabilities

In line with the Eurosystem's harmonised accounting rules, gold, foreign exchange and financial instruments (including part of the securities holdings not purchased for monetary policy purposes) are revalued at market rates and prices as at the end of each quarter.

The net impact of the revaluation on each balance sheet item as at 30 June 2023 is shown in the additional column "Difference compared with last week due to quarter-end adjustments". The gold price and the principal exchange rates used for the revaluation of balances were as follows:

Gold: EUR 1,753.313 per fine oz.

USD: 1.0866 per EUR JPY: 157.16 per EUR CNY: 7.8983 per EUR
