## MAIN ITEMS OF BANKS' BALANCE SHEETS (1) 12 MONTH PERCENTAGE CHANGES

#### FOOTNOTES

(1) Eurosystem harmonized definitions (see the Methodological Appendix of the "Money and Banking" Supplement to the Statistical Bulletin). The figures refer to the business of Italian banks with counterparties resident in Italy. The growth rates are calculated including loans not stated in banks' balance sheets because securitized (partially estimated up to May 2010) and excluding changes in stocks not due to transactions (e.g. changes due to exchange rate variations, value adjustments and reclassifications). The figures for the last month are provisional. In addition to the monthly developments for the reference month, this press release incorporates revisions to the data for previous months. The related timeseries are available on the Bank of Italy's website under Statistics/Statistical database (BIP on-line).

(2) In addition to households and non-financial corporations, the private sector includes insurance corporations, pension funds and the other financial institutions; transactions concluded with central counterparties are excluded.

(3) Includes overnight deposits, deposits with agreed maturity, deposits redeemable at notice and repos; deposits connected with securitizations are excluded.

(4) Nominal value.

(5) Market value.
