30 August 2019

€-coin falls slightly in August

- In August **€-coin** resumed its decline, falling to 0.18 from 0.21 in July, after having recorded a temporary improvement last month.
- The indicator continues to be adversely affected by the slowdown in international trade, the weak industrial cycle and the consequent worsening in business confidence, especially in the manufacturing sector.
- The **€-coin** indicator developed by the Bank of Italy provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by the Bank of Italy and CEPR.
- Next **€-coin** release dates: **Friday, 27 September 2019** and **Thursday, 31 October** (provisional).

€-coin and euro-area GDP – August 2019

Source: Bank of Italy and Eurostat.

Note: The €-coin series is based on the real time estimates of the indicator at a given date and hence the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

€-coin collates data from a large set of macroeconomic time series (industrial production indices, business surveys, demand indicators, stock market indices and more). It extracts the information that is relevant for tracking underlying GDP trends for the entire area.

The **€-coin** estimate is timely, anticipating Eurostat's official release of the area-wide GDP growth figure by several months. It also provides a reasonably close forecast of the quarterly growth rate net of the more volatile components. The estimate of underlying growth trends by **€-coin** has two key advantages:

- (i) monthly frequency, with release several months ahead of the official euro-area GDP estimate;
- (ii) immunity to the short-term fluctuations and measurement errors that mark quarterly output growth; that is, the index figure is an indicator of the euro area's actual growth momentum.

The following table shows the performance of the €-coin indicator over the last year:

Month	€-COIN
August 2018	0.47
September 2018	0.52
October 2018	0.54
November 2018	0.47
December 2018	0.42
January 2019	0.31
February 2019	0.24
March 2019	0.20
April 2019	0.18
May 2019	0.20
June 2019	0.14
July 2019	0.21
August 2019	0.18
