€-coin decreases further in June

- **€-coin** fell again in June (from 0.45 to 0.39).
- The indicator continues to be affected by weak business and consumer confidence.
- The **€-coin** indicator developed by Banca d'Italia provides a summary index of the current economic situation in the euro area. The indicator is an estimate of quarterly GDP growth shorn of the most erratic components (seasonal variations, measurement errors and short-run volatility). **€-coin** is published monthly by Banca d'Italia¹ and CEPR.
- The next publication dates for **€-coin** are **Tuesday, 4 August** and **Wednesday 2 September** (to be confirmed).

€-coin and euro-area GDP

Sources: Banca d'Italia and Eurostat.

Note: The €-coin series is based on the real time estimates of the indicator at a given date and therefore the series is not revised. On the other hand, the GDP growth rates are calculated on the basis of Eurostat's most recently published series and do reflect any changes in the historical data.

€-coin is constructed monthly by using a vast set of macroeconomic time series (e.g. industrial production indices, business and household surveys, demand indicators, and stock market indices) in order to extract the data needed to estimate the underlying trend of euro-area GDP growth.

€-coin precedes the official euro-area GDP figure released by Eurostat by several months and gives an early indication of the trend net of any erratic or short-term components.

The following table shows the performance of the €-coin indicator over the last year:

Month	€-COIN
June 2025	0.26
July 2025	0.36
August 2025	0.47
September 2025	0.48
October 2025	0.49
November 2025	0.48
December 2025	0.52
January 2026	0.49
February 2026	0.54
March 2026	0.48
April 2026	0.52
May 2026	0.45
June 2026	0.39
