

## 6th Joint Research Conference on Firm Financing, Organization and Dynamics: "Adapting to a riskier and more fragmented world"

**Banca d'Italia, 11-12 December 2023**

Banca d'Italia, Banque de France, EIEF and Sciences Po, in cooperation with the CEPR, are organizing their sixth joint research conference on trends in firm financing, firm organization and firm dynamics, to be held in Rome on 11-12 December 2023.

The conference aims to create a forum for discussion on issues related to the recent patterns of firms' activity, the organization of production and financing decision, as well as their determinants, consequences and implications for policymaking. This year's issue of the conference particularly welcomes contributions investigating how firms' adapt to the ecological and energy transitions, the impact of energy shocks and green innovation, economic sanctions, and the international transmission of shocks.

Topics of interest include, but are not limited to:

- Firms' strategic adaptation to climate change and policies
- Digitalization, organization and green innovation
- The impact of the energy shocks on firms and markets
- The international transmission of shocks and the future of GVCs
- The economics of sanctions
- The rise of corporate responsibility
- Financing conditions amid uncertainty and the normalization of monetary and fiscal policies
