# Development Data Partnership

More timely and granular information, such as that routinely collected by the private sector, increases the efficiency and effectiveness of public service and policymaking. However, several barriers limit the ability of international organizations to access and responsibly use such data.

The **Development Data Partnership** provides the market, legal, and technical infrastructure necessary to facilitate public-private data partnerships for public good at scale.

PILLARS OF THE PARTNERSHIP

- Legal Foundation
- Responsible Data Use
- Multi-Disciplinary Teams
- Secure IT Architecture
- Data Partnership Portal
- Data Goods

FOUR STEPS TO ACCESS DATA

1 Data Partnership
A standard data license agreement is signed

2 Project Proposals
Data partners evaluate all proposals for using their data

3 Data Management
Data are securely and responsibly managed through shared IT infrastructure

4 Data Goods
Derived data products and produced code are shared

CURRENT DEVELOPMENT PARTNERS

IDB · INTERNATIONAL MONETARY FUND · WORLD BANK GROUP
