

BANCA D'ITALIA

Supplements to the Statistical Bulletin
Monetary and Financial Indicators

Balance of Payments

New series

Anno XI Number 49 - 12 September 2001

NOTICE TO READERS

Starting with issue number 20 of 6 April 1999, the “Balance-of-Payments” Supplement reports statistics compiled in accordance with the Fifth edition of the International Monetary Fund’s *Balance of Payments Manual*.

The main innovations concern:

- the allocation of current items to the current account and the capital account;
- the inclusion in the financial account of bank and non-bank capital movements and the net change in reserve assets;
- the classification of direct investment on a directional basis;
- the classification of bank capital on a functional basis;
- the addition of the separate item Financial derivatives (net);
- the inclusion in the item Reserve assets only of the change in the positive subitems; the change in the negative subitems is included in the item Other investment.

The statistics compiled in accordance with the IMF’s Fifth Manual are not fully comparable with those published previously (the Methodological Appendix describes some of the most important differences). The main aggregates of the series have been reconstructed back to 1996 (1997 for the data in euros). Reconstructed data are not yet available for some of the disaggregated series (see Tables 5, 6, 7 and 8), but will be published in one of the next issues.

The reconstructed data for the period before 1999 are provisional and, especially for some disaggregated items, are likely to be revised.

Work is under way on the preparation of data disaggregated on the basis of euro-area and non-euro-area resident counterparties and a detailed breakdown of the changes in reserve assets.

GENERAL INFORMATION

- I. - Unless specified otherwise, the figures have been computed by the Bank of Italy.
- II. - Symbols and conventions:
- the phenomenon in question does not occur;
 - the phenomenon occurs but its value is not known;
 - .. the value is known but less than the minimum considered significant.
- Figures in parentheses in roman type () are provisional, those in parentheses in italics () are estimated.
- III. - The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the electronic archive in which information to be released to the public is held. A similar code identifies the different aggregates shown in each table.
- IV. - The methodological notes in the last part of the Supplement are identified by electronic codes that refer to the tables and, within each table, to the individual aggregates. Notes that refer to a single observation are also identified by the date of that observation.

This supplement shows amounts in both lire and euros.

For the period prior to the introduction of the single currency on 1 January 1999, the figures in euros have been obtained by converting the amounts in lire at a rate corresponding to the irrevocable exchange rate of the lira adopted from the beginning of 1999 (1,936.27 lire to the euro). For these figures the indication “values in euros” is thus to be taken as meaning “values in lire converted at the irrevocable exchange rate”.

SUPPLEMENTS TO THE STATISTICAL BULLETIN

On 1 January 1999 eleven countries adopted the euro as their common currency and the exchange rates against the euro of the currencies of these countries were irrevocably fixed; on 1 January 2001 Greece joined the euro area. Since the April 1999 issue of this Supplement (no. 20 - 6 April 1999) only the exchange rates of the euro against the currencies of non-euro-area countries are published. The historical series of the lira are to be found in earlier issues of the Supplement and on CD-ROM. Persons wishing to calculate the exchange rates of the lira and the currencies of the other euro-area countries since January 1999 (January 2001 for Greece) can use the following conversion rates:

	Italian lira	German mark	French franc	Spanish peseta	Dutch florin	Belgian/ Luxembourg franc	Austrian schilling	Portuguese escudo	Irish pound	Finnish markka	Greek drachma
Unit of currency per euro	1,936.27	1.95583	6.55957	166.386	2.20371	40.3399	13.7603	200.482	0.787564	5.94573	340.750

METHODOLOGICAL APPENDIX

GENERAL INDICATIONS

GLOSSARY

The glossary is based on the Fifth edition of the International Monetary Fund's *Balance of Payments Manual*, to which reference is made for the complete definition of the various items. Under the accounting convention adopted for the balance of payments, transactions, such as imports, that give rise to a payment abroad are classified as debits and those, such as exports, that give rise to a receipt from abroad are classified as credits; balances are calculated as the difference between credits and debits. In the financial account, assets, recorded with a negative sign, comprise residents' acquisitions of assets abroad, while liabilities, recorded with a positive sign, comprise non-residents' acquisitions of assets vis-à-vis residents; in the balance, an increase in net assets is recorded with a negative sign.

CURRENT ACCOUNT

The current account includes all transactions (other than those in financial items) between resident and non-resident entities.

a. Goods

Comprising General merchandise, Goods for processing, Repairs on goods, Goods procured in ports by carriers and Non-monetary gold. Goods are recorded according to the fob-fob definition, whereby they are valued at the frontier of the exporting country (foreign trade statistics are typically compiled on the basis of the cif-fob definition, whereby imports are valued at the frontier of the country compiling the statistics).

b. Services

Transportation includes freight and passenger transportation by all modes of transportation and other distributive and auxiliary services, such as loading and unloading and storage, the overhaul and cleaning of means of equipment, shippers and agents fees. Freight insurance, goods procured in ports by carriers, repairs and rentals of transportation equipment without crew are excluded.

Travel covers goods and services acquired (or acquired on their behalf or however supplied to them) by travelers who stay for less than one year in a country in which they are not resident. This time limit does not apply to students or medical patients; military, government agency and embassy personnel and members of their families are excluded.

Communications services cover postal, courier and telecommunications services.

Construction services cover construction and installation project work performed abroad by resident enterprises (and vice versa). Goods imported and exported for construction works are included in this item and not under goods.

Insurance services cover the provision to non-residents (and vice versa) of services such as the insurance of goods exported and imported and, more generally, life and non-life insurance and pension funds. The amount included the fee for the service provided and not the total premium.

Financial services include commissions and fees for resident/non-resident letters of credit, lines of credit, foreign exchange transactions and intermediation involving financial assets, etc.

Computer and information services cover resident/non-resident transactions related to hardware consultancy, information services (from data processing to news agency services), and maintenance and repair of computers related equipment.

Royalties and license fees cover receipts (exports) and payments (imports) of residents and non-residents for the use of non-financial non-produced assets and proprietary rights.

Other business services cover merchanting and miscellaneous business, professional and technical services.

Personal services cover personal, cultural and recreational services provided to non-residents by residents (and vice versa). They include services associated with the production of films, music, radio and television programmes, and their distribution.

Government services cover services not included elsewhere associated with governmental and international organizations and entities.

c. Income

Compensation of employees covers wages, salaries and other benefits, in cash or in kind and valued gross, paid to non-resident workers.

Investment income covers receipts and payments associated, respectively, with holdings of external financial assets by residents and with liabilities to non-residents.

d. Current transfers

Current transfers are the offsets to changes, which take place between residents and non-residents, in the ownership of real resources and financial items. They do not include transfers of ownership of fixed assets; transfers of funds linked to the acquisition or disposal of fixed assets or the forgiveness of debts, which are included under Capital transfers; they include both transfers of a public nature and those of a private nature.

CAPITAL ACCOUNT

a. Capital transfers

This item refers to transfers of ownership of fixed assets; transfers of funds linked to the acquisition or disposal of fixed assets and the forgiveness of debts; it includes both transfers of a public nature and those of a private nature.

b. Intangible assets

These include transactions involving the ownership (not the use) of intangible assets such as patents and goodwill. Ownership rights to land are excluded.

FINANCIAL ACCOUNT

a. Direct investment

Direct investment covers the initial transaction between the investor and the investee enterprise and all subsequent transactions between them. Direct investment transactions are subclassified into equity capital, reinvested earnings and other transactions between the investor and the investee enterprise or with their affiliated enterprises. The latter case (linked, for example, to loans between affiliated companies) does not apply to banks, for which only equity and subordinated debt transactions are included.

b. Portfolio investment

This item covers transactions between residents and non-residents involving equity securities and debt securities. Transactions covered under direct investment are excluded.

c. Other investment

This item covers trade credits, loans, deposits and other accounts receivable and payable.

d. Derivatives

This subitem covers transactions in financial derivatives.

e. Reserve assets

The reserve assets of the European Central Bank and the national central banks making up the Eurosystem refer to highly liquid, marketable and creditworthy claims on non-residents of the euro area denominated in foreign currency, both at the national and at the euro level. Transactions involving this aggregate are included in this item; derivatives are shown as a component of the aggregate.

RECONCILIATION WITH THE STATISTICS PUBLISHED PREVIOUSLY

Intangible assets: these include items, such as patents and trade marks, that under the old system were included in business services.

Insurance: the new definition excludes claims paid, which are now included under transfers. In particular, the remaining quota of gross premiums and claims paid is included in the Financial account for life insurance and in Current transfers for non-life insurance.

Travel: this item includes health services, previously included in personal services.

Financial services: these include items previously included in intermediation.

Information services: these include items previously included in business services.

Royalties and licenses: these include items previously included in business services.

Direct investment: this includes the direct investment abroad of banks and the investment in Italy in Italian banks, which was previously included in bank capital.

Portfolio investment: portfolio investment abroad includes that of Italian banks, which was previously included in bank capital.

Other investment: includes the bank loans and deposits made/received by Italian banks, which were previously included in bank capital.

Reserve assets: in addition to the definitional differences linked to the start of the Third Stage of European Monetary Union, reserves are now calculated on a gross basis, without the previous offsetting of short-term and medium and long-term liabilities in foreign currency.

NOTES TO THE TABLES

The order in which the tables are shown is based on their code numbers. The notes to each table are set out below, together with references to the "Notes to the classification variables" section where appropriate.

TAAE0220–INDICATORS OF COMPETITIVENESS (PERIOD AVERAGES; INDICES, 1993=100)

The table shows the indicators of competitiveness calculated on the basis of the producer prices of

manufactures in twenty-five countries. For the methodology, see the article "Nuovi indicatori di tasso di cambio effettivo nominale e reale", in Banca d'Italia, *Bollettino Economico*, no. 30, February 1998. Rounding may cause discrepancies between the monthly, three-monthly and annual figures.
