

# Balance of Payments and International Investment Position

17 August 2018

For further information: [statistiche@bancaditalia.it](mailto:statistiche@bancaditalia.it)  
[www.bancaditalia.it/statistics/index.html](http://www.bancaditalia.it/statistics/index.html)

**Current account: 12-month cumulated balances**  
(billions of euros)

Figure 1

In the twelve months ending in June 2018, the current account balance surplus amounted to 48.4 billion euros (2.8 per cent of GDP), compared to 44.8 billion in the twelve months ending in June 2017. The increase was due to the improvement, of 3.0 billion and 1.3 respectively, in the balances of primary and secondary income, which was partially offset by the negligible reduction of the goods surplus and the slight worsening of the services deficit (0.7 billion overall).

**Financial account: 12-month cumulated balances**  
(billions of euros)

Figure 2

In the twelve months ending in June 2018, net acquisitions of foreign assets amounted to 42.2 billion. The surplus in portfolio investment (126.4 billion, as a result of net purchases of foreign assets by residents by 98.2 billion and net sales of Italian assets by foreign investors by 28.3 billion) was partially offset by the balance of other investment (76.2 billion) and by that of direct investment (5.3 billion), both negative.

**Financial account – assets**  
(monthly flows; billions of euros)

**Figure 3**

In June 2018 net disposals of foreign financial assets amounted to 4.5 billion. Italian residents reduced direct investment abroad by 5.1 billion and “other investment” by 1.6 billion, while net acquisitions of foreign portfolio securities amounted to 1.5 billion (those of equity securities and, most of all, mutual fund shares amounted to 3.4 billion and were partly compensated by net sales of debt securities worth 1.9 billion). Net acquisitions of official reserves amounted to 0.7 billion.

**Financial account – liabilities**  
(monthly flows; billions of euros)

**Figure 4**

In June foreign liabilities decreased by 3.9 billion. Liabilities for direct and portfolio investment declined (by 4.3 and 42.4 billion, respectively), while liabilities for other investment increased by 42.8 billion. The reduction in liabilities for portfolio instruments issued in Italy was due to net sales by foreign investors of equity assets (4.1 billion) and debt instruments (38.3 billion, of which 33,0 pertaining to public-sector securities).

## General information

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
  - the phenomenon does not occur;
  - .... the phenomenon occurs but its value is not known;
  - .. the value is known but is nil or less than half the final digit shown.

Figures in parentheses in roman type () are provisional. Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the database in the electronic archive in which information to be released to the public is held. A similar code identifies the different aggregates shown in each table.

## Balance of payments and international investment position

### Notes to the tables

*The order of the tables in the following notes is based on their code numbers. The notes to each table are set out below, together with references to the "Notes to the classification variables" section where appropriate.*

#### **TBP60085 - Financial account**

Italy's balance of payments data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity. Starting from January 2009, investment portfolio data are derived, security-by-security, as the difference of the monthly stocks of foreign securities held by residents (assets) and by nonresidents (liabilities), in quantity or nominal value, evaluated at the average price of the security in the reference period. The data sources used to calculate the stocks of foreign securities are the reports of resident custodians (mainly banks), anonymous and security-by-security, on securities held in custody on behalf of investors supplemented by the reports of resident banks and money market funds and the Bank of Italy on their own securities and by a sample survey on assets held abroad by non-bank entities.

#### **TBP60300 - Current account: balances**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity.

#### **TBP60310 - Current account: credits**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity.

#### **TBP60320 - Current account: debits**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity.

#### **TBP60400 - International travel by purpose: credits, debits and balances**

Data are derived from the sample survey on Italy's international tourism, carried out by the Banca d'Italia on a continuous basis since 1996. The survey consists in questioning a sample of inbound and outbound travellers at the borders. Two main activities are carried out each year: around 150,000 face-to-face interviews in order to collect information on the travellers' expenditure and on a set of detailed traveller's characteristics and behaviour, and about 1,500,000 counting operations for disaggregating the number of travellers - drawn by administrative sources - by country of residence.

#### **TED60500 - Breakdown of external liabilities other than equity (external debt)**

The data are compiled on the basis of the sixth IMF's Balance of Payments and International Investment Position Manual (BPM6) and therefore are consistent with those related to international investment position. External debt statistics are a subset of the international investment position statistics, as the former do not include financial derivatives, equity capital and reinvested earnings. Partial misalignments between the two sets of statistics may be due to the differences in the provisional nature of the data. With effect from end-2008 data, portfolio investment stocks are calculated on the basis of an anonymous security-by-security reporting of the stocks held for investors by depositories.

## **Balance of payments and international investment position**

### **TICOM250 - Indicators of competitiveness based upon producer prices of manufactures (vis-à-vis 60 partner countries; period averages; indices, 1999=100)**

The table shows indicators of competitiveness calculated on the basis of the producer prices of manufactures in sixty-one countries (sixty-two countries until the report "Balance of Payments and International Investment Position" published in April 2018 in the 'Statistics' series of the Bank of Italy). As of the report "Balance of Payments and International Investment Position" published in May 2018 Venezuela has been excluded from the computation of the indicators due to the interruption of the dissemination of official data on prices for this country. For the methodology, see A. Felettigh, C. Giordano, G. Oddo and V. Romano, *Reassessing price-competitiveness indicators of the four largest euro-area countries and of their main trading partners*, Banca d'Italia, Questioni di economia e finanza (Occasional Papers), 280, July 2015. Rounding may cause discrepancies between the monthly, quarterly and annual data.

### **TIIP0200 - International investment position: net positions**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity. Further information is included in the notes to Tables TIIP0300 e TIIP0400.

### **TIIP0300 - International investment position: assets**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity. With effect from end-2007, Italy's international investment position is compiled on the basis of a statistical data collection and compilation system based on stock data; the series prior to end-2007 have been revised to provide continuity with the new data. With effect from end-2008 data, portfolio investment stocks are calculated on the basis of an anonymous security-by-security reporting of the stocks held for investors by depositories (as provided for in Guidelines ECB/2004/15 and ECB/2007/3).

### **TIIP0400 - International investment position: liabilities**

The data have been compiled since 2013 on the basis of the international standards laid down by the IMF's Balance of Payments and International Investment Position Manual (BPM6) and reconstructed for the earlier periods to guarantee continuity. With effect from end-2007, Italy's international investment position is compiled on the basis of a statistical data collection and compilation system based on stock data; the series prior to end-2007 have been revised to provide continuity with the new data. With effect from end-2008 data, portfolio investment stocks are calculated on the basis of an anonymous security-by-security reporting of the stocks held for investors by depositories (as provided for in Guidelines ECB/2004/15 and ECB/2007/3). Starting with the November 2013 issue of the Supplement, the external debtor position in financial derivatives of General government of Italy includes new information on transactions with foreign banks. The information became available following a cooperation agreement with the Ministry of Economy and Finance, under which new estimation methods consistent with national accounts and balance of payments definitions were developed. Since the variation in the liability side is entirely due to valuation adjustments, no corrections were made to balance of payments flows.

'Statistics' series publications are available on the Bank of Italy's site:
