## Statistical tables

### The world economy

- Table a1 — GDP at constant prices  
 " a2 — Industrial production  
 " a3 — Consumer prices  
 " a4 — External current account  
 " a5 — Short-term interest rates  
 " a6 — Long-term interest rates and share price indices  
 " a7 — Ecu/euro exchange rates and the price of gold  
 " a8 — Indicators of competitiveness

### The Italian economy

- Table a9 — Sources and uses of income  
 " a10 — Industrial production and ISAE business opinion indicators  
 " a11 — Labour force, employment and unemployment  
 " a12 — Italian consumer price indices  
 " a13 — Harmonized index of consumer prices: Italy  
 " a14 — Harmonized consumer price indices in the euro area  
 " a15 — Index of producer prices of manufactures sold in the domestic market: Italy  
 " a16 — Index of producer prices of manufactures sold in the domestic market: main euro-area countries  
 " a17 — Average unit values in lire of imported and exported manufactures: Italy  
 " a18 — Balance of payments: current account and capital account  
 " a19 — Balance of payments: financial account

### Money, credit and interest rates

- Table a20 — State sector borrowing requirement  
 " a21 — Financing of the general government borrowing requirement  
 " a22 — General government debt  
 " a23 — ECB interest rates  
 " a24 — Bank interest rates: domestic fund-raising in lire/euros  
 " a25 — Bank interest rates: loans to resident customers in lire/euros  
 " a26 — Banks and money market funds: main balance sheet items  
 " a27 — Banks: main balance sheet items  
 " a28 — Banks: loan and securities portfolios  
 " a29 — Banks: deposits and bonds  
 " a30 — Supervisory capital and capital adequacy (on a consolidated basis)  
 " a31 — Italian investment funds: securities portfolios and net assets  
 " a32 — Italian investment funds: net purchases of securities  
 " a33 — Portfolio management services  
 " a34 — Italian components of euro-area monetary aggregates: residents of Italy and the rest of the euro area  
 " a35 — Financial assets: residents of Italy  
 " a36 — Credit: residents of Italy

## SYMBOLS AND CONVENTIONS

In the following tables:

- the phenomenon in question does not occur;
- .... the phenomenon occurs but its value is not known;
- .. the value is known but is nil or less than half the final digit shown;
- ( ) provisional;
- ( ) estimated.

Notes to the statistical tables are on pp. 46a-50a.

**Table a1**

**GDP at constant prices**

(1) From December 1998 the item "Borrowing from central bank" refers exclusively to the accounts of the Bank of Italy (and not to the consolidated accounts of the Bank of Italy and the UIC) since that month saw the completion of the transfer of the reserves held by the UIC to the Bank of Italy in conformity with Legislative Decrees 43/1998 and 319/1998 and the UIC's securities portfolio is included under "Medium and long-term securities excluding central bank". At 31 December 1998 borrowings from the central bank are estimated to have amounted to around 2.3 trillion lire.

## Notes to the statistical tables

### **Table a1**

Sources: IMF, OECD, Istat and national statistics.  
For India, GDP at factor cost (fiscal year: April-March).

### **Table a2**

Sources: IMF, Eurostat, Istat and national statistics.  
For Italy, see the notes to Table a10.  
For China, industrial value added. For Hong Kong, Indonesia and Thailand, manufacturing.

### **Table a3**

Sources: IMF, Eurostat, Istat and national statistics.  
For the euro area, Germany, France and Italy, harmonized consumer prices. For the United Kingdom, consumer prices excluding mortgage interest.

### **Table a4**

Sources: IMF, ECB and national statistics.  
The annual data for the current account balance may not coincide with the sum of the seasonally adjusted quarterly data.

### **Table a5**

Sources: ECB and national statistics.  
Official reference rates. For the United States, federal funds target rate; for Japan, discount rate; for the euro area, rate for main refinancing operations; for the United Kingdom, base rate; for Canada, official bank rate.  
Money market rates. For the United States, rate on 3-month CDs; for Japan, 3-month call rate (un-collateralized); for the euro area, 3-month Euribor (until December 1998, based on national statistics); for the United Kingdom, 3-month interbank rate; for Canada, rate on 3-month prime corporate paper.

### **Table a6**

Source: National statistics.  
Bond yields (secondary market, gross). For the United States, 10-year Treasury notes and bonds; for Germany, 9-10 year public sector bonds; for Japan, France, the United Kingdom and Canada, 10-year public sector bonds; for Italy, yield on 10-year benchmark BTPs listed on the screen-based market.

Share indices (1994=100). For the United States, Standard and Poor's composite index; for Japan, Topix; for Germany, FAZ Aktien; for France, CAC 40; for Italy, MIB; for the United Kingdom, FTSE All-Share; for Canada, composite index of the Toronto stock exchange (closing prices).

### **Table a7**

Source: IMF for the gold price.  
Period averages except for gold prices, which are end-of-period values.

### **Table a8**

Sources: Based on IMF and OECD data and national statistics.  
The table shows real effective exchange rates calculated on the basis of the producer prices of manufactures of 25 countries. For the methodology, see the Article "Nuovi indicatori di tasso di cambio effettivo nominale e reale", in the Bank's *Bollettino Economico*, no. 30, February 1998.

### **Table a9**

Source: Istat.  
Based on the European system of national accounts ESA95. The item "Other domestic uses" includes consumption of general government and non-profit institutions serving households, changes in inventories and valuables, and statistical discrepancies.

**Table a10**

Sources: Based on Istat and ISAE data.

The indices of industrial production are adjusted for variations in the number of working days. The seasonal adjustment of the general index of production and that of the indices of production by economic use are carried out separately using the TRAMO-SEATS procedure; the aggregate index may therefore differ from the weighted mean of the disaggregated indices. For the period up to January 1995, the seasonal adjustment procedure is applied to series obtained by shifting directly from indices with base 1990=100 to indices with base 1995=100. Raw data are shown for the level of foreign orders and for stocks of finished goods.

**Table a12**

Source: Istat.

As of February 1992 the consumer price index for worker and employee households excludes tobacco products (Law 81/1992). Since then the percentage changes between the indices including and excluding tobacco products have been calculated using Istat reconciliation coefficients (1.0034 for food products and 1.0009 for the overall index).

**Table a15**

Source: Istat.

The table reflects the introduction of the new base (1995=100), which replaces that previously used by Istat (1990=100).

**Table a20**

The table shows the state sector borrowing requirement on the basis of the definition of the sector that comprises the budget and Treasury operations, the Deposits and Loans Fund, the Southern Italy Development Agency (suppressed in April 1993), the National Road Agency (ANAS) and the former State Forests.

The budget deficit excludes accounting items that are offset under Treasury operations, loan disbursements and repayments and settlements of debts involving state sector bodies or which merely result in accounting transactions between the budget and Treasury operations; on the other hand, it includes VAT refunds channeled through taxpayers' tax accounts. As of May 1998, following the

introduction of the single tax payment form (Legislative Decree 241/1997) and the single mandate procedure (Ministerial Decree 183/1998), the main taxes are paid without distinction into a single account at the Treasury and subsequently allocated among the different budget items. The receipts shown in this table are based on data collected at the time they are booked in the budget accounts; accordingly, they do not include any balances at the Treasury deriving from delays in the booking of receipts. Furthermore, owing to the new method of paying taxes the monthly figures of the "Receipts" and "Payments" series are affected by the leads and lags with which tax refunds and collection charges are entered in the accounts. The item "Treasury operations" includes transactions vis-à-vis the Treasury Ministry (net of accounting items vis-à-vis the budget) and minor items vis-à-vis the Bank of Italy and the UIC. The flows shown in the subitem "Collection accounts" show the changes in receipts pending the allocation of central government taxes, the share of Irap due to the regions and the social security contributions paid using the single mandate procedure but due to INPS. A negative flow indicates that the amounts booked in the month exceeded the revenue received and vice versa. The interest on postal savings certificates is determined on a cash basis. The additional borrowing of "ANAS, Forests and other bodies" includes the net funds they raised directly in the market. The items "Settlements of past debts" and "Privatization receipts" permit the reconciliation of the effective funding requirement and the definition of the borrowing requirement currently used to determine the objectives for fiscal policy. The figures for the last year are provisional.

**Table a21**

The table shows the financing of the general government borrowing requirement. "Foreign loans" comprise only those raised abroad directly; they do not include loans contracted indirectly via banks, which are included under "Lending by banks", or BOTs and other government securities acquired by non-residents, which are included in the respective categories of domestic debt. The item also includes CTEs stamped as being for circulation abroad. The item "Central bank financing" includes the Treasury's overdraft with the Bank of Italy, a suspense account and the Treasury payments account (see Law 483/1993) and the sinking fund for the redemption of government securities (see Laws 432/1993 and 110/1997). Postal savings certificates are included at their face value at issue. "Medium and long-term securities", "Foreign loans" and "Other" include the corresponding financial instruments related to operations entered into by the State Railways

with the cost borne by the government. The figures for the last year are provisional.

#### Table a22

The table shows general government debt and its composition (the figure for the state sector is shown as a memorandum item). The debt (end-of-period data) is stated at face value and that denominated in foreign currency is translated at year-end exchange rates. The items "Medium and long-term securities excluding central bank", "BOTs and BTEs excluding central bank" and "Borrowing from central bank" include only securities acquired outright. CTEs that are not stamped as being for circulation abroad and BTEs are included in domestic debt. Medium and long-term securities include bonds issued by Credipol on behalf of the Treasury and the former autonomous government agencies; the amount of these bonds is deducted from the lending of banks to these bodies. Medium and long-term securities also include the BTPs issued in connection with the closure of the Treasury's current account with the Bank of Italy. Medium and long-term securities and Treasury bills do not include those held by social security institutions and other bodies included in general government. PO deposits comprise current accounts, net of "service" accounts and Treasury payments to municipalities and provinces that are held with the PO. Postal savings certificates are included at their face value at issue. The stocks of lending by banks are based on automated prudential returns. "Debt issued abroad" includes only loans raised directly abroad and CTEs that are stamped as being for circulation abroad. Foreign loans are translated into lire on the basis of the currency in which the debt was originally contracted, regardless of subsequent swap transactions. In the same way as for the state sector borrowing requirement, the debt figures for "Medium and long-term securities", "Lending by banks" and "Debt issued abroad" include the corresponding financial instruments related to operations entered into by the State Railways with the cost borne by the government. From December 1998 the item "Borrowing from central bank" refers exclusively to the accounts of the Bank of Italy (and not to the consolidated accounts of the Bank of Italy and the UIC) since that month saw the completion of the transfer of the reserves held by the UIC to the Bank of Italy in conformity with Legislative Decrees 43/1998 and 319/1998 and the UIC's securities portfolio is included under "Medium and long-term securities excluding central bank". The figures for the last year are provisional.

#### Table a23

The interest rates on the "deposit facility" and the "marginal lending facility" are set by the Governing Council of the ECB and represent respectively the lower limit and the upper limit of the corridor of official interest rates.

On 8 June the Governing Council of the ECB announced that, starting from the operation to be settled on 28 June 2000, the main refinancing operations of the Eurosystem would be conducted as variable rate tenders, applying the multiple rate auction procedures. It also decided to set a minimum bid rate for these operations.

Under Legislative Decree 213/1998, as of 1 January 1999, for a period of not more than 5 years, the Bank of Italy periodically determines "the reference rate for instruments linked to the former discount rate", which replaces the latter. The reference rate is modified by an order issued by the Governor taking account of the changes involving the monetary instrument used by the ECB that the Bank of Italy considers to be the closest equivalent to the official discount rate.

#### Tables a24 and a25

The annual data refer to the month of December.

The figures are based on the 10-day survey introduced in January 1995. The sample consists of the banks participating in the survey at each reference date.

The indication "lire/euros" means that as of January 1999 the figures include amounts in euros and other euro-area currencies.

#### Table a26

This table refers to the statistical returns submitted to the European Central Bank by Italian banks and money market funds. Since the start of the third phase of Economic and Monetary Union, intermediaries subject to statistical reporting requirements in the euro area have been known as Monetary Financial Institutions (MFIs). The category comprises central banks, credit institutions and all other resident financial institutions whose business consists in receiving deposits and/or close substitutes for deposits from institutions other than MFIs and in granting credit and/or making investments in securities for their own account. For further details, see the Methodological Appendix and the notes to the tables of the "Monetary Financial Institutions: Banks and Money Market Funds" Supplement to the Statistical Bulletin.

For the period from December 1995 to May 1998, the time series are estimated drawing on supervisory returns;

as of June 1998 data are reported by banks in accordance with the new harmonized definitions adopted by the ESCB for the euro area as a whole. "Loans" include repo assets and bad debts. "Deposits" include current account deposits, deposits with agreed maturities and redeemable at notice, and repo liabilities. "Debt securities" include subordinated liabilities. The item "Capital and reserves" is made up of share capital, reserves, provisions for general banking risks and the balance of prior-year profits and losses.

#### Table a27

The annual data refer to the month of December.

"Securities" are stated at book value. "Capital and reserves" comprise own funds, loan loss provisions and the subordinated liabilities of domestic and foreign branches; as of 1997 data for "Supervisory capital" are available only on a quarterly basis. "Interbank accounts" include the liquid balances on correspondent accounts. "Interest-bearing external assets" and "Interest-bearing external liabilities" refer to aggregates that do not coincide exactly with those included in the foreign exchange statistics.

For further information, see the section "Note metodologiche" in the Appendix to the *Relazione annuale per il 1998*.

#### Table a28

The annual data refer to the month of December.

"Loans" do not include those granted by branches abroad.

"Other" securities refer to banks' holdings of lira and foreign currency bonds issued by residents.

The indication "lire/euros" means that as of January 1999 the figures include amounts in euros and other euro-area currencies.

#### Table a29

The annual data refer to the month of December.

The subitem "Short-term certificates of deposit" refers to lira-denominated CDs with a maturity at issue of less than 18 months.

The indication "lire/euros" means that as of January 1999 the figures include amounts in euros and other euro-area currencies.

#### Table a30

Source: Supervisory returns.

The data refer to supervisory capital and to the solvency ratio calculated on a solo basis.

Supervisory capital is determined as the algebraic sum of a series of positive and negative items, whose inclusion in core or supplementary capital is admitted, with or without restrictions, according to the item.

Paid-in capital, reserves, provisions for general banking risks and innovative capital instruments – net of any own shares or capital parts, intangible assets and loss for the year – are the elements of core capital, which is included in the calculation of supervisory capital without restriction. Revaluation reserves, provisions for losses, hybrid capital instruments and subordinated liabilities – net of any revaluation losses on securities held as financial fixed assets and other negative items – constitute supplementary capital, which is included in the calculation of supervisory capital up to the amount of core capital.

The regulations governing the solvency ratio require banking groups and banks not belonging to a group to satisfy a minimum capital requirement – defined as the ratio of their supervisory capital to the total of their on- and off-balance-sheet assets, weighted according to their potential riskiness – of 8 per cent.

The solvency ratio figures take account of the prudential requirements for market risks.

#### Table a31

SICAVs are included. "Other financial assets" include CDs, banker's acceptances and commercial paper. The difference between "Net assets" and "Total portfolio" consists of other net assets (mainly current accounts and repos). Rounding may cause discrepancies in totals.

#### Table a32

"Other financial assets" include CDs, banker's acceptances and commercial paper. Rounding may cause discrepancies in totals.

#### Table a33

The amounts shown for "Banks" refer to the portfolio management services they provide directly. "Other financial assets" include CDs, banker's acceptances and commercial paper. "Net inflow" is calculated as the sum of monthly flows.

**Table a34**

All the items refer to the liabilities included in M3 of Italian MFIs and the Post Office towards the “money holding sector” of the entire euro area. This sector, adopted by the ESCB in the harmonization of national statistics, comprises all the residents of the euro area apart from MFIs and central governments. Accordingly, it includes “other general government” (local authorities and social security funds) and “other residents” (non-money-market investment funds, other financial institutions, non-financial corporations, insurance corporations, households, and non-profit institutions serving households).

“Currency in circulation” comprises Bank of Italy banknotes and Treasury coins. “Current account deposits” comprise current accounts held with resident MFIs and the Post Office; bank CDs redeemable within 24 months are included under “Deposits with agreed maturities up to 2 years”; freely available PO deposit book accounts and ordinary PO savings certificates are included under “Deposits redeemable at notice up to 3 months”. Money market paper includes atypical securities and banker’s acceptances liabilities. Money market funds are defined as collective investment funds whose shares/units are close substitutes for deposits in terms of liquidity and/or which invest in tradable debt securities with a residual maturity of up to one year.

The contributions to the euro-area monetary aggregates are obtained by summing the relevant items and deducting Italian MFIs’ holdings of: banknotes and coin in lire and the other euro-area currencies, for M1, and bonds issued by MFIs resident in the rest of the euro area, for M3. For further details on the methods used to compile these statistics, see “Note metodologiche e informazioni statistiche – Aggregati monetari e creditizi dell’area dell’euro: le componenti italiane” in the series Supplements to the *Statistical Bulletin*, Volume X, no. 33, 12 June 2000.

**Table a35**

All the items refer to the financial assets of the Italian “money holding sector” (see the note to Table a34); the share of each item held by non-money-market funds is shown separately.

“Total monetary assets” comprise currency in circulation, current account deposits, deposits with agreed maturity up to 2 years, deposits redeemable at notice up to 3 months, repos, money market fund shares/units and money market paper, and debt securities up to 2 years.

“Other deposits” comprise deposits with agreed maturity over 2 years, deposits redeemable at notice over 3 months and forward PO savings certificates, which are measured on the basis of the price at issue.

“Government securities” comprise CCTs, BTPs, CTZs, CTEs and other medium and long-term government securities at face value. The item refers to securities acquired outright; it excludes the securities acquired by the money holding sector under repos but includes those sold.

“Other financial assets” include enterprises’ surety deposits; “Other financial assets held by non-money-market funds” include shares issued by residents in Italy.

**Table a36**

The items refer to “other residents” and “general government”, which have replaced respectively the “non-state sector” and the “state sector” in the statistics compiled until December 1998 (see “Note Metodologiche e informazioni statistiche – Aggregati monetari e creditizi dell’area dell’euro: le componenti italiane” in the series Supplements to the *Statistical Bulletin*, Volume X, no. 33, 12 June 2000).

“Bonds placed domestically” are those issued by “other residents” after deducting the amounts held by residents of the rest of the euro area and the rest of the world.

“External finance” comprises the loans disbursed to “other residents” and the debt securities thereof bought at issue by residents of the rest of the euro area and the rest of the world.

“General government debt” is stated at face value and is calculated, in accordance with the EU definition, gross of the Treasury’s claims on the Bank of Italy (balances on the Treasury payments account, the sinking fund for the redemption of government securities and other smaller accounts) since December 1998, and of claims on the Bank of Italy and the UIC for the preceding period.

## List of abbreviations

ABI	— <i>Associazione bancaria italiana</i> Italian Bankers' Association
BI	— <i>Banca d'Italia</i> Bank of Italy
BOT	— <i>Buoni ordinari del Tesoro</i> Treasury bills
BTP	— <i>Buoni del Tesoro poliennali</i> Treasury bonds
