

Economic Bulletin

STATISTICAL APPENDIX

Number 65 July 2012

SYMBOLS AND CONVENTIONS

Unless indicated otherwise, figures have been computed by the Bank of Italy.

In the following tables:

- the phenomenon in question does not occur
 - the phenomenon occurs but its value is not known
 - .. the value is known but is nil or less than half the final digit shown
 - :: the value is not statistically significant
 - (*)* provisional; estimates are in italics
-

LIST OF TABLES

	Page
1 The world economy	
1.1 Sources and uses of income: United States	5
1.2 Sources and uses of income: Japan	6
1.3 Sources and uses of income: United Kingdom	7
1.4 Gross domestic product and domestic demand in selected emerging countries	8
1.5 Consumer prices in some industrial and emerging countries	10
1.6 Balance of payments: United States	11
1.7 Balance of payments: Japan	12
1.8 Balance of payments: United Kingdom	13
1.9 Balance of payments of selected emerging countries	14
1.10 International oil prices	16
1.11 Prices in dollars of non-energy raw materials	18
1.12 Indicators of competitiveness in some industrial and emerging countries	19
1.13 Sources and uses of income: France	21
1.14 Sources and uses of income: Germany	22
1.15 Sources and uses of income: euro area	23
1.16 Industrial production in the euro area	24
1.17 Employment in the euro area	25
1.18 Employment in the euro area: percentage changes on the previous period	27
1.19 Employment in the euro area: percentage changes on the year-earlier period	29
1.20 Unemployment rate in the euro area	31
1.21 Unit labour costs, per capita compensation and productivity: France	33
1.22 Unit labour costs, per capita compensation and productivity: Germany	34
1.23 Unit labour costs, per capita compensation and productivity: euro area	35
1.24 Consumer prices in the euro area	36
1.25 Harmonized index of consumer prices: main euro-area countries	37
1.26 Index of producer prices of industrial products sold on the domestic market: main euro-area countries	38
1.27 Expectations and forecasts of consumer price inflation	39
1.28 Balance of payments of the euro area: current and capital account	40
1.29 Balance of payments of the euro area: financial account	41
1.30 Eurosystem interest rates	42

	2 The Italian economy	Page
2.1	Sources and uses of income	43
2.2	Industrial production and business opinion indicators	44
2.3	Labour force, employment and unemployment	45
2.4	Contractual earnings	46
2.5	Actual earnings	48
2.6	Unit labour costs, per capita compensation and productivity	49
2.7	National consumer price indices	50
2.8	Harmonized index of consumer prices	52
2.9	Consumer price inflation differentials between Italy and France, Germany and the euro area	53
2.10	Index of producer prices of industrial products sold on the domestic market	54
2.11	Producer prices of industrial products sold on the foreign market	55
2.12	Merchandise exports and imports <i>cif-fob</i> by main countries and areas	56
2.13	Merchandise exports and imports <i>cif-fob</i> by branch of economic activity and balances	57
2.14	Balance of payments: current account and capital account	58
2.15	Balance of payments: financial account	59
2.16	Treasury bill yields and interbank rates	60
2.17	Banks and money market funds: balance sheet	61
2.18	Italian components of euro-area monetary aggregates, excluding currency	62
2.19	Lending by banks in Italy by geographical area and sector	64
2.20	Supervisory capital and capital requirements	65
2.21	Issues of Italian government securities	66
2.22	Net assets and subscriptions of Italian investment funds and foreign funds controlled by Italian intermediaries	67
2.23	Formation of the general government borrowing requirement	68
2.24	Financing of the general government borrowing requirement	69
2.25	General government debt	70
	Methodological Notes	71

Further statistical data can be found in the series *Supplements to the Statistical Bulletin*.

(1) Based on the producer prices of manufactures of 62 countries. For the method of calculation see "A New Indicator of Competitiveness for Italy and the Main Industrial and Emerging Countries" in *Supplements to the Statistical Bulletin, Methodological Notes*, 66, December 2005. Any discrepancies between monthly, quarterly and annual data are due to rounding.

(1) Based on the producer prices of manufactures of 62 countries. For the method of calculation see "A New Indicator of Competitiveness for Italy and the Main Industrial and Emerging Countries" in *Supplements to the Statistical Bulletin, Methodological Notes*, 66, December 2005. Any discrepancies between monthly, quarterly and annual data are due to rounding.

(1) The interest rates on the "Deposit facility" and on the "Marginal lending facility" are fixed by the ECB Governing Council and represent, respectively, the lower and upper limits of the official interest rate corridor. From 28 June 2000 to 8 October 2008 the Eurosystem's main refinancing operations were effected via variable rate auctions; starting 15 October 2008, fixed rate auctions have been utilized.

Table 2.1

(1) Before tax; the annual values are the arithmetic means of monthly rates. BOT interest rates (average) are calculated as a quantity-weighted average of the compound allotment rates in the auctions held in the month indicated (3, 6, 12-month and other maturities). Yields are calculated on the basis of the business year (360 days). The interbank rates (overnight, at 1, 3, 6 and 12 months) recorded daily on the interbank money market are weighted average bid/ask prices.

(1) The table includes the information on the balance sheet of Cassa Depositi e Prestiti S.p.A.. The annual data refer to the month of December. For the definition of the items and further information, see the tables and methodological appendix of *Supplements to the Statistical Bulletin – Money and Banking*. – (2) As of 2010 the loans series includes all securitized or otherwise assigned loans that do not satisfy the IAS criteria for cancellation, as for the preparation of the financial statements. The application of these criteria has led to the re-recognition of previously cancelled assets, with a consequent increase in the related series. As of the same date securities other than shares held by banks include the asset-backed securities bought back by the same bank when the securitized loans have not been derecognized from their balance sheets. Previously the rules implied that only a small part of these securities were included in the banks' portfolios. The tables and methodological appendix of *Supplements to the Statistical Bulletin – Money and Banking* show the overall impact of the foregoing methodological changes on the main items affected. – (3) Some aggregates with MFIs as the counterparty may record discontinuities due to banking group reorganizations.

(4) As of 2010, securitization liabilities that are the "Counterpart of loans and/or other assets" disposed of in a securitization but still recognized on the statistical balance sheet are included, by convention, among deposits with agreed maturity over two years. – (5) In February 2012 the number of money market investment funds and the value amounts in the corresponding time series underwent significant reduction as a consequence of Regulation ECB/2011/13, which introduced for statistical purposes the same definition of money market fund used by the European Securities and Markets Authority. – (6) As from December 2011, "bonds" includes government-guaranteed bonds pursuant to Law 201/2011. – (7) As of June 2010, "capital and reserves" includes provisions for adjustment to loan exposures previously included under "other liabilities".

May	742,229	-5.3	1,177,728	3.4	1,370,898	1.5

(1) The Italian components of euro-area monetary aggregates and the growth rates do not include currency because it is not possible to measure the actual quantity of euro banknotes and coins in each country since the introduction of the euro. M1 includes banks and post office current accounts; M2 is the sum of M1 plus deposits with agreed maturity up to 2 years and deposits redeemable at notice up to 3 months; M3 is the sum of M2 plus repurchase agreements, money market share and units, and bonds issued by MFIs with a maturity of up to 2 years, minus bonds issued by euro-area MFIs held by Italian MFIs. As of October 2007 data for M2 include time and indexed postal savings certificates. For details see the methodological appendix and tables of *Supplements to the Statistical Bulletin – Money and Banking*.

METHODOLOGICAL NOTES

Table 2.20

Until 31 December 2006, the definition of supervisory capital and the method of calculating risk-weighted assets were based on the prudential regulatory framework known as Basel I.

On 1 January 2007, the new prudential regulatory framework (Basel II) contained in the Bank of Italy circular no. 263 of 27 December 2006 (“New regulations for the prudential supervision of banks”) came into force. The new definition of supervisory capital was adopted immediately. Since at the EU level banks were allowed to retain the previous prudential regime for the whole of 2007, the new method of calculating risk-weighted assets only came fully into force on 1 January 2008.

For further information regarding the new definition of supervisory capital and the method of calculating risk-weighted assets see *Istruzioni per la compilazione delle segnalazioni sul patrimonio di vigilanza e sui coefficienti patrimoniali* (circular no. 155 of 18 December 1991), available in Italian on the Bank's website.

Table 2.23

The figures for the budget exclude accounting items that are offset under Treasury operations, loan disbursements and repayments and settlements of debts involving state sector bodies or which merely result in accounting transactions between the budget and Treasury operations.

The tax component of state budget receipts refers to the amounts allocated each month to the various chapters of the budget. In fact, as of 1998, the time at which amounts are allocated may not coincide with the time at which they are paid. Tax revenue is not adjusted for tax refunds (included in the budget under payments) and includes VAT accruing to the European Union. The monthly figures are consistent with those published by the Ministry for the Economy and Finance in *Conto Riassuntivo del Tesoro*, except that they are net of accounting transactions with the Sicily and Sardinia regions. The sub-item “Collection account” shows the change in receipts paid using the single mandate procedure and awaiting allocation (including central government taxes, IRAP due to the regions and social security contributions due to INPS). A negative (positive) sign indicates that the amounts allocated in the month were higher (lower) than the revenue received.

The formation of the central government borrowing requirement (computed as the sum of the budget plus other central government operations) includes transactions with other general government bodies. Accordingly, the borrowing requirement of local government and social security institutions refers exclusively to their financing needs over and above those covered by central government transfers. The unconsolidated central government borrowing requirement net of debt settlements and extraordinary revenue, consisting mainly of privatization receipts, is shown as a memorandum item. The data on central government debt settlements and extraordinary revenue are used to provide an estimate of the general government net borrowing requirement. As of December 2003 Cassa Depositi e Prestiti S.p.A. is no longer part of general government and loans to local governments are included in the item “Borrowing requirement of local government and social security institutions after consolidation”. The Cassa's deposits with the Treasury and postal deposits pertaining to the Treasury appear in the item “Other central government operations”.

Tables 2.24 and 2.25

General government debt consists of the sector's total financial liabilities at face value at issue. The debt is consolidated within and between the various sub-sectors, i.e. it does not include liabilities constituting assets in the same instruments of general government bodies, following the definition adopted in the European Monetary Union's excessive deficit procedure. The aggregate is calculated according to the methods set out in Council Regulation (EC) No. 479/2009 by summing the financial liabilities falling in the following categories: currency and deposits, securities other than shares, and loans. Lending by monetary and financial institutions (MFIs) is allocated to the general government sub-sector of the actual borrower, i.e. the body required to make the repayment, and not to the sub-sector of the body that receives the funding.

The discrepancy between the borrowing requirement and the change in the debt is due to differences in the treatment of general government deposits with the Bank of Italy and in the accounting standards used to compute the two statistics. More specifically: a) in the case of the borrowing requirement, securities issues, excluding BOTs, are valued on the basis of their "net proceeds" while for the debt they are stated at face value; b) for the borrowing requirement, liabilities denominated in foreign currency are converted at the exchange rate applying at the time of settlement, while for the debt they are valued at end-of-period exchange rates.

Medium and long-term securities include those issued in repayment of past debts, those issued by the former autonomous agencies, which are repaid from the budget, those issued in 1993 to set up the Treasury's current account with the central bank in accordance with Law 483/1993, and those issued in November 1994 in connection with the conversion of the temporary Treasury account pursuant to Ministerial Decree of 15.11.1994 (76,206 billion lire). The latter, which were initially held in the Bank of Italy's portfolio, were the subject of a bond conversion transaction in December 2002.

The sub-item "Change in deposits with the Bank of Italy and investments of liquidity" mainly includes the Treasury payments account (Law 483/1993 and a Ministerial Decree of 19.9.2005), the sinking fund for the redemption of government securities (Law 432/1993, amended by Decree Law 436/1994 and ratified by Law 110/1996), other time-deposit operations on behalf of the Treasury (OPTES) involving the investment of Treasury funds with the banking system (Decree of the Ministry for the Economy and Finance 25391, 25 October 2011) and, until November 1994, the Treasury's current account with the Bank of Italy and the Treasury suspense account (Law 483/1993).

As of December 2003, when Cassa Depositi e Prestiti S.p.A. ceased to be part of general government, postal deposits include only those pertaining to the Ministry of the Economy and Finance. The item includes ordinary and fixed-term postal savings certificates and postal current accounts and is included, together with the Cassa's deposits with the Treasury, in the item "Currency and deposits"; from the same date lending by the Cassa to general government is included in the items "Other operations" and "Other liabilities". As of September 2006 Cassa Depositi e Prestiti S.p.A. is included among MFIs; from the same date its loans to general government bodies are included in the item "MFI loans".

Following Eurostat's decision of 23 May 2005 the item "Currency and deposits" includes the payments on account made by tax collectors under Decree Law 341/2003, ratified by Law 31/2004, and Decree Law 282/2004, ratified by Law 307/2004, while the debts contracted by Infrastrutture S.p.A. to finance the high-speed train project are included in the items "Medium and long-term securities" and "MFI loans".
