This section provides further details on the debt of local government in Italy. The figures are compiled by the Bank of Italy in accordance with the methodology harmonised at European level under the Excessive Deficit Procedure (EDP).
The section is updated twice a year, in February and October.
Further details on the Bank of Italy's statistics on local government debt are available in the Statistical Database (BDS), which can also be accessed via the links provided on this page.

1. Local government debt as a percent of GDP

This section presents data on local government debt at the end of the latest available year, broken down by region and expressed as a percentage of regional GDP.
The figures refer to **non-consolidated debt**, which also includes local government liabilities to other general government subsectors.Intro text Local Govt debt in % of regional GDP
