24 Credit access conditions for firms	
25 Growth in bank funding: contributions of the various components	
26 Banks' funding gap	
27 New non-performing loan rates	
28 Non-performing loans	
29 Banks' investment in Italian public sector securities	
30 Main profit and loss items of banks	
31 Capitalization of banks and banking groups	
32 Capital and liquidity indicators of the banking system	
33 Share prices and CDS spreads of listed banks	
The public finances and government debt financing conditions	17
34 Main public finance indicators	
35 Main public finance indicators (European comparison)	
36 Government securities – stocks	
37 Average cost and average residual maturity of the public debt	
38 Government benchmark securities: gross yields at maturity	
39 Yield spreads between euro-area countries and German 10-year government bonds	
Macroeconomic projections	20
40 Growth and inflation forecasts	

1 – Coincident indicator (Ita-coin) and Italian GDP

(percentage changes)

Source: Banca d'Italia.

1) Monthly estimates of changes in GDP on the previous quarter net of the most erratic components. Further details are available on the Banca d'Italia website: 'Ita-coin coincident cyclical indicator' <https://www.bancaditalia.it/statistiche/tematiche/indicatori/indicatore-ciclico-coincidente/index.html?com.dotmarketing.htmlpage.language=1>. Since November 2019, the dataset used for the Ita-coin estimate has been expanded with new data on services, which has meant adjusting the indicator profile. – (2) Quarterly data; percentage change on previous quarter.

2 – GDP and the main components of demand (1)

(quarterly data; indices 2007=100)

Source: Based on Istat data.

(1) Chain-linked volumes adjusted for seasonal and calendar effects.

3 – GDP, national demand, foreign trade (1)

(percentage changes on previous period)

	Gross domestic product	Gross fixed investment	Resident household and NPISH consumption (2)	Government consumption	Total national demand (3)	Exports of goods and services	Imports of goods and services
2022	4.8	7.4	5.3	0.8	5.6	9.9	12.9
2023	0.9	10.1	0.5	1.0	0.3	-0.2	-1.9
2024	0.8	-3.1	1.2	1.5	0.6	-0.4	-1.0
2025	0.5	3.5	1.1	0.6	1.3	1.2	3.6
2025 - Q2	0.0	1.6	0.3	0.4	0.6	-1.7	0.2
2025 - Q3	0.2	1.3	0.3	0.1	0.1	2.2	2.0
2025 - Q4	0.3	1.0	0.1	0.2	1.1	-1.0	1.3
2026 - Q1	0.3	0.7	0.5	0.0	-0.7	2.2	-0.7

Source: Istat.

(1) Chain-linked volumes; quarterly data are adjusted for seasonal and calendar effects. – (2) Non-profit institutions serving households. – (3) Including changes in inventories and valuables.

4 – Industrial production and business confidence (1)

(indices 2021=100; seasonally adjusted monthly data)

Source: Based on Istat data.

(1) Following the operational difficulties linked to the Covid-19 emergency, the survey on Business confidence index for April 2020 was not conducted.

5 – Firms' assessment of the conditions for investing (1)

(quarterly data; percentage points)

Source: Banca d'Italia, Survey on Inflation and Growth Expectations (in collaboration with Il Sole 24 Ore up to October 2018).

(1) Balance of positive and negative responses compared with the previous quarter.

6 – Household confidence index and unemployment expectations (1)

(raw monthly data; indices 2021=100 and percentage points)

Source: Based on Istat data.

(1) Following the operational difficulties linked to the Covid-19 emergency, the survey for April 2020 was not conducted. In June 2013 Istat introduced methodological changes and so, as a result, subsequent data cannot be directly compared with those preceding that date. – (2) Balances of positive responses ('high', 'increasing') and negative responses ('low', 'decreasing').

7 – Household income and saving

(seasonally adjusted quarterly data)

Source: Based on Istat data.

(1) Net of the variation in the final consumption expenditure deflator for resident households. Indices: 2015=100. – (2) Consumer households' savings as a percentage of gross disposable income; 4-term moving average.

8 – Main labour market indicators

(seasonally adjusted monthly data; per cent, unless otherwise specified)

(a) Italy: Employment; activity rate

(b) Euro area: Unemployment rate

Sources: (a) Istat's labour force survey; (b) Eurostat; for Italy, Istat's labour force survey.

(1) Millions of persons.

9 – Contractual earnings and labour costs per hour worked (1)

(year-on-year percentage changes)

(a) Non-farm private sector

(b) Total economy

Source: Istat's national accounts and contractual earnings survey.

(1) Raw monthly data for contractual earnings; seasonally adjusted quarterly data for hourly labour costs. Labour costs include gross wages and social security contributions.

10 – Consumer price inflation and contributions of the main components (1)

(monthly data; 12-month percentage changes and percentage points)

Source: based on Eurostat data.

(1) Harmonized index of consumer prices. – (2) Includes non-food and non-energy products, and services. – (3) Includes food and energy products.

11 – Indicators of inflation

(monthly data; 12-month percentage changes)

	HICP (1)				PPI (2)
	Italy		Euro area		Italy
	Overall index	Excl. Energy and food	Overall index	Excl. Energy and food	Overall Index
2024	1.1	2.2	2.4	2.8	-5.7

Mar.	1.6	1.8	2.6	2.3	5.4
Apr.	2.8	1.7	3.0	2.2	8.8
May (3)	3.3	2.0	3.2	2.5	

Source: based on Istat and Eurostat data.

(1) Harmonized index of consumer prices. – (2) Index of producer prices of industrial products sold on the domestic market. – (3) Preliminary data.

12 – House prices and sales

(quarterly data; indices 2015=100)

Sources: Based on data from Osservatorio del Mercato Immobiliare (OMI) of the Italian Revenue Agency, Banca d'Italia, Istat and Consulente Immobiliare.

(1) House prices deflated by the consumer price index. – (2) Adjusted for seasonal and calendar effects.

13 – Value of goods exports (1)

(seasonally adjusted monthly data)

Source: Based on Eurostat and Istat data.

(1) Indices: Q4 2019=100; 3-month moving averages. Starting from February 2020, the United Kingdom is included in the non-EU aggregate.

14 – Price-competitiveness indicators (1)

(monthly data; indices 2019=100)

Sources: Based on ECB, CEPII, Eurostat, IMF, OECD, UN data and national statistics.

(1) In relation to 60 competitor countries; based on producer prices of manufactured goods and weighted by manufactured goods trade flows. An increase in an index indicates a loss of competitiveness.

15 – Balance of payments

(net balances; billions of euros)

		Current account		Capital account	Net lending/borrowing to the rest of the world	Financial account		Errors and omissions

	Mar.	1.7	3.7	0.4	2.2	-3.5	19.6	1.2	-5.6

Source: Banca d'Italia.

16 – Current account balance and its main components

(per cent of GDP; 4-quarter moving average)

Source: Istat for GDP; based on Istat foreign trade data for the breakdown between energy and non-energy products.

17 – TARGET balance and cumulative balance of payments flows (1)

(monthly data; billions of euros)

Source: Banca d'Italia.

(1) Using the balance of payments accounting identity, an improvement in the Banca d'Italia's debtor balance vis-à-vis the ECB in the TARGET payment system may reflect investment in Italy by non-residents (greater liabilities), residents' disposals of foreign assets (lower assets) or a current account and capital account surplus. Cumulative flows since July 2011. – (2) Net funding in the form of loans, deposits and other investments by the banking sector, including those intermediated by resident central counterparties. – (3) Direct investment, financial derivatives, other investment, official reserves, errors and omissions.

18 – Net international investment position (1)

(percentage of GDP)

Source: Istat, for GDP.

(1) The net position at the end of the quarter equals the net position at the end of the previous quarter corrected for financial account flows during the quarter and for valuation adjustments.

19 – Financial debt of households (1)

(per cent of gross disposable income)

Sources: Banca d'Italia and Istat for Italy, ECB for euro-area countries, Office for National Statistics and Bank of England for the United Kingdom, Federal Reserve System - Board of Governors and Bureau of Economic Analysis for the United States.

(1) Data refer to consumer and producer households; for the United States data refer to only consumer households. End-of-period data.

20 – Indicators of firms' borrowing (1)

(per cent)

Sources: Banca d'Italia (Financial Accounts) and analyses of Istat data, National Accounts by institutional sector.

(1) Data refer to non-financial corporations sector. - (2) Leverage is calculated as the ratio of financial debts (bank loans, bonds, other loans) to the sum of financial debts and shareholders' equity at market prices. End-of-period data. - (3) 4-quarter cumulative data (right-hand scale).

21 – Firms' financial debt (1)

(as a percentage of GDP)

Source: based on ECB data.

(1) The data refer to the non-financial corporations sector. End-of-period data.

22 – Bank lending to the private sector (1)

(monthly data; 12-month percentage changes)

Source: Supervisory reports.

(1) Includes bad debts, repos and loans not recorded in banks' balance sheets because they have been securitized. The percentage changes are net of reclassifications, exchange rate variations, value adjustments and other variations not due to transactions; operations concluded with central counterparties are excluded.

23 – Interest rates on new loans (1)

(monthly data; per cent)

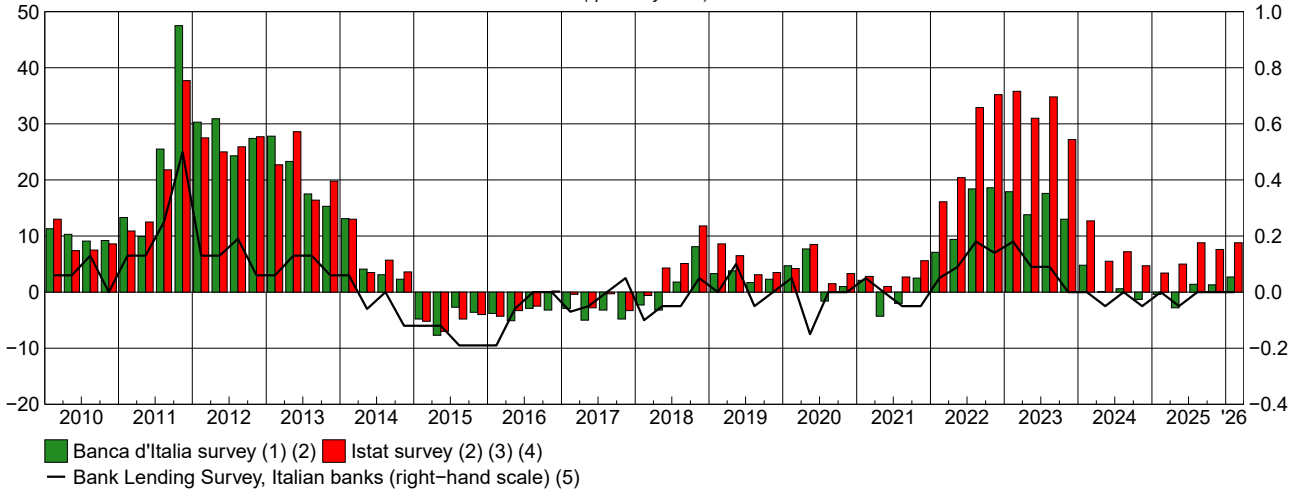

Source: Based on Banca d'Italia and ECB data.

(1) Averages. Data refer only to transactions in euros and are gathered and processed using the Eurosystem's harmonized method.

24 – Credit access conditions for firms

(a) Total
(quarterly data)

(b) By firm size (2) (3) (4)
(quarterly data)

(1) Source: Banca d'Italia, Survey on inflation and growth expectations (in collaboration with Il Sole 24 Ore up to October 2018); firms in industry (excluding constructions) and services. – (2) Net percentage of firms reporting difficulty in obtaining credit. – (3) Source: Istat, Monthly business confidence survey in the manufacturing sector. – (4) Last survey in the quarter. – (5) Source: Banca d'Italia, the euro area bank lending survey. Degree of credit supply tightening compared with the previous quarter (diffusion index).

25 – Growth in bank funding: contributions of the various components (1)

(percentage points and 12-month percentage changes)

Source: Supervisory reports.

(1) The sum of the contributions is equal to the percentage change over 12 months in the total funds raised. The percentage changes in the single components are calculated net of reclassifications, exchange-rate variations, value adjustments and other variations not due to transactions. Net liabilities towards central counterparties are the funds raised by way of repos with non-residents via central counterparties.

26 – Banks' funding gap (1)

(billions of euros and per cent)

Source: Supervisory reports. Data includes only those reported by credit intermediaries registered in the Banca d'Italia's supervisory register, excluding branches of foreign banks.

(1) Difference between lending to residents and retail funding (residents' deposits plus bank bonds subscribed by households). – (2) Right-hand scale (billions).

27 – New non-performing loan rates (1)

(quarterly data; per cent)

Source: Central Credit Register.

(1) Annualized quarterly flows of adjusted NPLs in relation to the stock of loans net of adjusted NPLs at the end of the previous quarter. Data seasonally adjusted where necessary.

28 – Non-performing loans (1)

(a) Italian banking system: total amount (2)

(billions of euros and per cent)

(b) Significant banks: share of total loans

(per cent)

Sources: Supervisory reports, on a consolidated basis for banking groups and on an individual basis for the rest of the Italian banking system; ECB, Supervisory Banking Statistics for the euro area.

(1) Includes loans to customers, credit intermediaries and central banks. End of period data. Amounts and ratios are calculated net and gross of provisions. – (2) Includes banking groups and banks subsidiaries of foreign intermediaries; excludes branches of foreign banks. – (3) Right-hand scale, per cent.

29 – Banks’ investment in Italian public sector securities (1)

(monthly data; billions of euros; per cent)

Source: Individual supervisory reports.

(1) All public sector securities, including those issued by local authorities. Data includes only those reported by credit intermediaries registered in the Banca d'Italia's supervisory register. The stock of Italian public sector securities in portfolios was revised starting in 2013, following the extension of the perimeter of general government as defined by Istat in agreement with Eurostat. – (2) Includes the cooperative credit banks merged into cooperative credit banking groups. – (3) Twelve-month moving average ending in the month indicated. The series 'total assets' does not include repurchased self-issued bonds. Right-hand scale.

30 – Main profit and loss items of banks (1)

Sources: Consolidated supervisory reports for banking groups, individual supervisory reports for stand-alone banks.

(1) As a ratio to average equity in the year; percentage points. For the definition of the items, see the Section Methodological Note of the Appendix of the 2025 Annual Report (available only in Italian).

31 – Capitalization of banks and banking groups

(indices and per cent)

Sources: Consolidated supervisory reports for banking groups, individual supervisory reports for stand-alone banks.
 (1) 'Common equity tier 1'. Index: 2014=100. – (2) 'Risk-Weighted Assets'. Index: 2014=100.

32 – Capital and liquidity indicators of the banking system

(per cent; reference date: December 2025)
