## Notice to Readers

The Public Finances Supplement to the Statistical Bulletin, no. 13 of 13 March 2009, contains data on general government debt and borrowing requirement for 2008. Thanks to more efficient use of the sources, from this edition of the Supplement onwards, data on the public finances will be published more promptly. In fact the publication of the statistics on the general government debt and borrowing requirement will be brought forward by one month and occur regularly in the second month after the reference month.

On 31 December 2008 the general government debt was equal to €1,663,637 million (105.8 per cent of GDP). At the same date in 2007 it had been equal to €1,598,975 (103.5 per cent of GDP). Revisions of the previously published data concerned only the figures for 2007 (see the table below). The changes are negligible and derive from the ordinary updating of the statistical sources. The changes to the ratio of the debt to GDP in the years 2005-07 reflect the revisions to the GDP data published by Istat on 2 March 2009.

The €64,662 million increase in the public debt reflects the general government borrowing requirement (€49,322 million), the increase in the assets held by the Treasury with the Bank of Italy (€10,609 million), and the issue of securities below par, which led to an increase in the debt over and above the borrowing requirement equal to €4,471 million. The depreciation of the euro increased the value of liabilities denominated in foreign currency by €260 million.

With reference to the breakdown by subsectors, the central government debt rose by €68,059 million to €1,555,928 million and as a ratio to GDP rose from 96.3 to 99 per cent. Local government debt fell by €3,035 million to €107,486 million and as a ratio to GDP fell from 7.2 to 6.8 per cent.

## METHODOLOGICAL APPENDIX

### GENERAL INDICATIONS

This publication contains figures on the borrowing requirement and debt of general government and its subsectors (central government, local government and social security institutions).

The borrowing requirement does not coincide with the change in the debt owing to the different ways in which general government deposits held with the Bank of Italy are treated and the different accounting standards applied in calculating the two aggregates. In particular: a) in the borrowing requirement issues of securities apart from BOTs are valued net of issue discounts and placement commissions, whereas they are included in the debt at nominal value; and b) in the borrowing requirement liabilities denominated in foreign currencies are converted using the exchange rate obtaining at the transaction settlement date, whereas in the debt they are converted using the end-of-period exchange rate. The formation of the central government borrowing requirement includes transactions with other general government entities; consequently, the borrowing requirements of local government and the social security institutions corresponds exclusively to their additional financing needs with respect to those met by state transfers.

General government debt consists of all the sector's financial liabilities valued at their face value at issue. It is consolidated between and within the subsectors. In other words it excludes liabilities that are assets, consisting of the same instruments, of entities belonging to general government, in line with the definition adopted for the European Economic and Monetary Union's excessive deficit procedure. The aggregate is calculated according to the methodological criteria established in European Council Regulation no. 3605/93 by summing the following categories of financial liabilities: currency and deposits; non-equity securities and loans. Loans from monetary financial institutions are allocated to the general government subsector the final borrower belongs to, i.e. that of the entity required to repay the loan and not that of the entity to which it is disbursed.

Table TCCE0100 shows the formation of the general government borrowing requirement. It is calculated as the balance on a cash basis of current and capital items and those of a financial nature (except for changes in cash balances, which in the case of general government are conventionally taken to correspond to the changes in the deposits held with the Bank of Italy). In the absence of monthly figures on the formation of the general government borrowing requirement, the data shown here are restricted to an analysis of the formation of the state budget balance. The balance of the central government's other transactions is thus obtained as the difference between the central government borrowing requirement calculated on the financing side and the balance of the state budget. As a memorandum item the table shows the unconsolidated central government borrowing requirement net of settlements of past debts and extraordinary revenue arising primarily in connection with privatizations.

Table TCCE0125 shows a breakdown of the general government borrowing requirement by instrument (the financing of the borrowing requirement). Unlike general government debt, it includes the change in deposits held with the Bank of Italy.

Table TCCE0155 shows the breakdown of the general government borrowing requirement by subsector.

Table TCCE0175 shows the breakdown of general government debt by instrument along the same lines as for the borrowing requirement. Securities are divided by maturity. The share of debt issued in foreign currency is also shown.

Table TCCE0200 shows the distribution of general government debt among the following holding sectors: Bank of Italy, other monetary financial institutions, other residents and non-residents.

Table TCCE0225 shows the distribution of general government debt among the different subsectors. Both the unconsolidated and the consolidated debt of each sector are reported.

Tables TCCE0250 and TCCE0275 cover local government debt. They analyze the debt by subsector (regions and autonomous provinces, provinces, municipalities and other entities) and instrument and by geographical area.

Table TCCE0300 shows general government debt together with the deposits this sector holds with the Bank of Italy. It also shows the debt net of deposits held with the Bank of Italy.

As of the issue of "The Public Finances" supplement to the Statistical Bulletin no. 62 of 10 November 2004, the presentation of statistics on the general government borrowing requirement and debt has been changed. In particular, new criteria for aggregating the information, homogeneous across the borrowing requirement and debt series, are introduced and a more detailed analysis provided of local government debt.

As of September 2006 Cassa Depositi e Prestiti s.p.a. is included among Monetary Financial Institutions and the loans it disburses to general government, previously included in the series "Other transactions" and "Other liabilities" are now included in the series "MFI loans". At the same time the breakdown by holding subsector is adjusted in accordance with the new classification.

The reconstruction of general government debt since the unification of Italy was completed in 2008. The data are updated monthly on the occasion of the publication of this Supplement and are available in the Statistics section of the Bank of Italy's website

## NOTES TO THE TABLES

*The order of the tables in the following notes is based on their code numbers. The notes to each table are set out below, together with references to the "Notes to the classification variables" section where appropriate.*

### TCCE0100 - FORMATION OF THE GENERAL GOVERNMENT BORROWING REQUIREMENT

S070207M - CENTRAL GOVERNMENT: BALANCE OF THE CHANGES IN TREASURY ACCOUNTS AND OTHER TRANSACTIONS (DEFICIT: -)

The difference between the state budget balance and the central government borrowing requirement based on financing data. The series consists primarily of the difference between payments made to the Treasury by the state budget and other entities and those made by the Treasury to non-state entities. As of December 2003 includes the deposits of the Cassa Depositi e Prestiti with the Treasury and the funds raised by the Post Office assigned to the Treasury.

### S428475M - STATE BUDGET: TAX REVENUE

Tax revenue refers to the amounts allocated each month to the relevant chapters of the state budget. It should be noted that as of 1998, with the introduction of the unified tax payment form and the single mandate procedure, the time taxes are paid to the Treasury is not the same as the time they are allocated; in some cases amounts may be paid in one month and allocated in another. Tax revenue is not adjusted for tax refunds (included in the budget under payments) and includes VAT accruing to the European Union. The monthly figures are consistent with those published by the Ministry for the Economy and Finance in Conto riassuntivo del Tesoro, except that they are net of accounting transactions with the Sicily and Sardinia regions.

S835207M - CENTRAL GOVERNMENT: GROSS BORROWING REQUIREMENT (DEFICIT: -)

Based on financing data.

S857863M - TAX COLLECTION ACCOUNTS

The amounts shown under this heading are the changes in the balance of taxes paid to the Treasury using the single mandate procedure and waiting to be allocated, with reference to central government taxes, Irap due to the regions and social security contributions due to INPS. A negative value indicates that the total amount allocated during the month exceeded the taxes and contributions actually paid to the Treasury and vice versa.

S888011M - LOCAL GOVERNMENT: ADDITIONAL GROSS BORROWING REQUIREMENT AFTER CONSOLIDATION (DEFICIT: -)

Based on financing data. The series shows local government's funding needs on a cash basis after deducting the sector's own revenues and transfers from other public bodies. As of December 2003 includes the loans of the Cassa Depositi e Prestiti to local authorities.

S900166M - SOCIAL SECURITY INSTITUTIONS: ADDITIONAL GROSS BORROWING REQUIREMENT AFTER CONSOLIDATION (DEFICIT: -)

Based on financing data. The series shows social security institutions funding needs on a cash basis after deducting their own revenues and transfers from other public bodies.

S916545M - PRIVATIZATION RECEIPTS AND OTHER EXTRAORDINARY REVENUE

The series includes receipts deriving from the privatization of public enterprises (net of any repurchases) and some items of extraordinary revenue, such as receipts in connection with the liquidation of enterprises and the proceeds of the sale of UMTS licences.

S926208M - CENTRAL GOVERNMENT: UNCONSOLIDATED BORROWING REQUIREMENT NET OF SETTLEMENTS OF PAST DEBTS AND PRIVATIZATION RECEIPTS (DEFICIT: -)

The unconsolidated borrowing requirement includes liabilities towards general government bodies outside central government.

S994979M - GENERAL GOVERNMENT: BORROWING REQUIREMENT NET OF SETTLEMENTS OF PAST DEBTS AND PRIVATIZATION RECEIPTS (DEFICIT: -)

Excludes settlements and privatizations effected by entities belonging to the central government.

### **TCCE0125 - FINANCING OF THE GENERAL GOVERNMENT BORROWING REQUIREMENT: BY INSTRUMENT**

S029605M - GENERAL GOVERNMENT: FINANCING OF THE GROSS BORROWING REQUIREMENT

Balance of the change in general government liabilities, excluding those that are assets of general government entities, and the change in deposits held with the Bank of Italy.
