(1) Overall effect of: a) premiums and discounts at issuance and at redemption; b) appreciation of inflation-indexed bonds; c) exchange rate variations. - (2) The series excludes liabilities connected with loans granted to countries belonging to the EMU member States, both bilaterally and via the European Financial Stability Facility (EFSF), and with the contribution to European Stability Mechanism (ESM) paid-in capital.

## NOTICE TO READERS

This publication reports data on the general government borrowing requirement and debt as revised following the notification sent to the European Commission on March 31 as part of the Excessive Deficit Procedure (EDP).

With respect to the figures published on March 16 this year, the debt has been revised upwards by 0.3 billion in 2016, 0.5 in 2017, 0.4 in 2018 and 0.6 in 2019 (see table). The revisions reflect the extension of the perimeter of general government as defined by Istat in agreement with Eurostat (see Istat press release “GDP and General Government Net Borrowing”, 2 march 2020) and the ordinary update of the sources.

The data will be analysed in the Bank of Italy's forthcoming Economic Bulletin, to be published on 17 April.

## General information

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
  - the phenomenon does not occur;
  - .... the phenomenon occurs but its value is not known;
  - .. the value is known but is nil or less than half the final digit shown.Figures in parentheses in roman type () are provisional. Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the electronic database holding the information to be released to the public. A similar code identifies the different aggregates shown in each table.

(1) The revenues shown in this table do not correspond to the taxes actually paid. The monthly flows are observed with reference to the time receipts are entered in the state budget, which, since May 1998, has not been the same as the time they are paid. In fact, as of May 1998, the main central government taxes are paid to the Treasury (and entered in the so-called "Tax collection accounts") and allocated to the various items of the state budget only some time afterwards. - (2) The flows shown under this heading refer to the changes in the balance of the "Tax collection accounts". A positive flow indicates an increase in the balance (the taxes received exceeded those allocated to the state budget) and vice versa.

## **The Public Finances: Borrowing Requirement and Debt**

### **Methodological appendix**

#### **General indications**

This publication contains figures on the borrowing requirement and debt of general government and its subsectors (central government, local government and social security institutions).

The borrowing requirement does not coincide with the change in the debt mainly owing to the different ways in which Treasury's liquid balances (general government deposits held with the Bank of Italy and Treasury's investments of liquidity) are treated; in fact the borrowing requirement is obtained as the change in the debt net of Treasury's liquid balances. The borrowing requirement and the debt also differ as a consequence of the different accounting standards applied in calculating the two aggregates. In particular: a) in the borrowing requirement issues of securities apart from BOTs are valued net of issue discounts, whereas they are included in the debt at nominal value; and b) in the borrowing requirement liabilities denominated in foreign currencies are converted using the exchange rate obtaining at the transaction settlement date, whereas in the debt they are converted using the end-of-period exchange rate; c) in the borrowing requirement indexed securities are revalued at redemption, whereas for debt the revaluation is imputed periodically. The formation of the central government borrowing requirement includes transactions with other general government entities; consequently, the borrowing requirements of local government and the social security institutions corresponds exclusively to their additional financing needs with respect to those met by state transfers.

General government debt consists of all the sector's financial liabilities valued at their face value. It is consolidated between and within the subsectors. In other words it excludes liabilities that are assets, consisting of the same instruments, of entities belonging to general government, in line with the definition adopted for the European Economic and Monetary Union's excessive deficit procedure. The aggregate is calculated according to the methodological criteria established in European Council Regulation no. 479/2009 by summing the following categories of financial liabilities: currency and deposits; non-equity securities and loans. Loans from monetary financial institutions are allocated to the general government subsector the final borrower belongs to, i.e. that of the entity required to repay the loan and not that of the entity to which it is disbursed.

Table TCCE0100 provides information about the formation of the central government borrowing requirement, starting from the state budget balance calculated as the balance on a cash basis of current and capital items (except for changes in Treasury's liquid balances); borrowing transactions are thus excluded. The change in treasury accounts balance is calculated as difference between the central government borrowing requirement (calculated on the financing side), with the sign reversed, and the state budget balance. As a memorandum item the table shows the extraordinary revenues arising primarily in connection with privatizations.

## The Public Finances: Borrowing Requirement and Debt

Table TCCE0125 shows a breakdown of the general government borrowing requirement by instrument.

Table TCCE0155 shows the breakdown of the general government borrowing requirement by subsector.

Table TCCE0175 shows the breakdown of general government debt by instrument along the same lines as for the borrowing requirement. Securities are divided by maturity, with an indication of the variable rate component. The share of foreign currency debt is also shown.

Table TCCE0200 shows the distribution of general government debt among the following holding sectors: Bank of Italy, other resident monetary financial institutions, resident financial institutions, other residents and non-residents.

Table TCCE0225 shows the distribution of general government debt among the different subsectors. Both the unconsolidated and the consolidated debt of each sector are reported.

Tables TCCE0250 and TCCE0275 cover local government debt. They analyze the debt by subsector (regions and autonomous provinces, provinces, municipalities and other entities) and instrument and by geographical area (north-west, north-east, centre, south and islands).

Table TCCE0300 shows general government debt together with Treasury's liquid balances (deposits held with the Bank of Italy and Treasury liquidity investments), general government deposits held with resident monetary financial institutions (net of Treasury liquidity investments), loans granted to countries belonging to the Economic and Monetary Union (both bilaterally and via the European Financial Stability Facility) and the Italian contribution to the capital of the European Stability Mechanism. The table also shows the debt net of Treasury's liquid balances.

Table TCCE0325 shows the breakdown of general government debt by residual maturity, with an indication of the variable rate component; the average residual maturity of the debt is also shown (in years).

Tables TCCE0350 and TCCE0375 show, for general government and central government respectively, the breakdown of debt by original maturity, instrument, currency and holders' residence.

In addition to this supplement, the historical series are also available in the electronic Statistical Database (BDS) in the Statistics section of the Bank of Italy's website ([infostat.bancaditalia.it/inquiry](http://infostat.bancaditalia.it/inquiry)).

### Notes to the tables

*The order of the tables in the following notes is based on their code numbers.*

#### **TCCE0100 - Formation of the central government borrowing requirement**

FP.M.IT.S13.TS02.888.102.116.COV.EUR.FPBI - Tax collection accounts

The amounts shown under this heading are the changes in the balance of taxes paid to the Treasury using the single mandate procedure and waiting to be allocated, with reference to central government taxes, Irap due to the regions and social security contributions due to INPS. A negative value indicates that the total amount allocated during the month exceeded the taxes and contributions actually paid to the Treasury and vice versa.

FP.M.IT.S1311.DIS.888.102.116.COV.EUR.FPBI - Privatization receipts and other extraordinary revenue

The series includes receipts deriving from the privatization of public enterprises and some items of extraordinary revenue, such as extraordinary dividends paid by public enterprises (associated with the disposal of assets; so-called super dividends) and the proceeds of the sale of UMTS licences. It also includes proceeds from the reimbursement of the financial instruments issued by banks and subscribed by the Ministry of the Economy and Finance in the context of the measures to support the financial system (Laws 2/2009 and 135/2012).

FP.M.IT.S1311.FAB.SBI3.103.115.COV.EUR.FPBI - Central Government: financing of the gross borrowing requirement

Balance of the change in central government liabilities, excluding those that are assets of general government entities, and the change in Treasury's liquid balances. State transfers to other general government entities contribute to the formation of the central government borrowing requirement. The series includes liabilities connected with loans granted to countries belonging to the Economic and Monetary Union via the European Financial Stability Facility.

FP.M.IT.S1311.TS01.888.102.116.COV.EUR.FPBI - Central Government: balance of treasury account (deficit: -)

The difference between the central government borrowing requirement (calculated on the financing side), with the sign reversed, and the state budget balance. The series consists primarily of two components: i) the balance of treasury's receipt not yet accounted for in the state budget and payments accounted for in the state budget but not yet disbursed (with the exception of borrowing transactions); 2) the balance of receipts and payments that pass through the treasury accounts carried out by government entities other than the state.

FP.M.IT.SBI38.BS01.888.102.116.COV.EUR.FPBI - State budget: tax revenue

Tax revenue refers to the amounts allocated each month to the relevant chapters of the state budget. It should be noted that as of 1998, with the introduction of the unified tax payment form and the single mandate procedure, the time taxes are paid to the Treasury is not the same as the time they are allocated; in some cases amounts may be paid in one month and allocated in another. Tax revenue is not adjusted for tax refunds (included in the budget under payments) and includes VAT accruing to the European Union. The monthly figures are consistent with those published by the Ministry for the Economy and Finance in "Conto riassuntivo del Tesoro", except that they are net of accounting transactions with the following regions: Sicily, Sardinia, since 2009 Friuli-Venezia Giulia and since 2012 Trentino-Alto Adige and autonomous provinces of Trento and Bolzano.

FP.M.IT.SBI38.BS07.888.102.116.COV.EUR.FPBI - State budget: balance between revenue and expenditure (deficit: -)

Balance on a cash basis of state budget current and capital items (except for changes in Treasury's liquid balances); the state budget balance excludes borrowing transactions.

### TCCE0125 - Financing of the general government borrowing requirement: by instrument

FP.M.IT.S13.F2.SBI3.103.115.COV.EUR.FPBI - General Government: currency and deposits (liabilities) in domestic currency - changes

Changes in Post Office funds, coins in circulation and deposits held with the Treasury by entities outside general government. As of December 2003, following the exclusion of Cassa Depositi e Prestiti from general government, Post Office funds include only the part pertaining to Ministry for the Economy and Finance.

FP.M.IT.S13.F22OP.SBI51.103.115.COV.EUR.FPBI - General Government: investments of liquid assets - changes

The change in the amounts of operations on behalf of the Treasury (OPTES) involving the investment of Treasury funds with the banking system (Decree of the Ministry for the Economy and Finance 25391, 25 October 2011). These operations are carried out by way of auctions or bilateral negotiation.

FP.M.IT.S13.F2BI1.S12BI19.103.115.COV.EUR.FPBI - General Government: Change in Treasury's liquid balances

The change in the Treasury payments account (Law 483/1993 and Ministerial Decree of 19.09.2005), the sinking fund for the redemption of government securities (Law 432/1993 as amended by Decree Law 436/1994, reiterated several times and ratified by Law 110/1996), other deposits held with the Bank of Italy including time deposits, operations on behalf of the Treasury (OPTES) involving the investment of Treasury funds with the banking system (Decree of the Ministry for the Economy and Finance 25391, 25 October 2011) and, until November 1994, the Treasury's current account with the Bank of Italy and of the provisional account (Law 483/1993).

FP.M.IT.S13.F2PO.SBI3.103.115.COV.EUR.FPBI - General Government: post office funds - changes

Change in Post Office funds. As of December 2003, following the exclusion of Cassa Depositi e Prestiti from general government, Post Office funds include only the part pertaining to Ministry for the Economy and Finance.

FP.M.IT.S13.F31.SBI3.103.115.COV.EUR.FPBI - General Government: short-term securities - net issues

Net issues of securities with an initial maturity equal to or less than one year made by general government and not subscribed by general government entities. Gross issues are valued net of issue discounts, except for BOTs, which are included at nominal value; redemptions are included at nominal value, except for commercial paper for which the net proceeds at issuance are included. For securities denominated in foreign currencies, the conversion is made using the exchange rate obtaining on the issue/redemption date; account is also taken of possible operations of cross currency swaps.

FP.M.IT.S13.F32.SBI3.103.115.COV.EUR.FPBI - General Government: medium and long-term securities - net issues

Net issues of securities with an initial maturity of more than one year made by general government and not subscribed by general government entities. Gross issues are valued net of issue discounts; redemptions are included at nominal value, except for CTZs, for which the net proceeds at issuance are included. For securities denominated in foreign currencies, the conversion is made using the exchange rate obtaining on the issue/redemption date; account is also taken of possible operations of cross currency swaps. The series also includes securities issued for the settlement of past debts, those issued by former autonomous government agencies to be redeemed by the state, those issued in December 1993 to establish the Treasury payments account at the Bank of Italy pursuant to Law 483/1993 and those issued in November 1994 to consolidate the suspense account referred to in the Ministerial Decree of 15.11.1994 (76.206 trillion lire); the latter securities, initially held in the Bank of Italy's portfolio, were the subject of a bond conversion transaction in December 2002. Following the decisions of Eurostat announced on 23 May 2005, the series includes securities issued by Infrastrutture S.p.A. to finance the construction of high-speed railway infrastructure.

FP.M.IT.S13.F4.SBI2.103.115.COV.EUR.FPBI - General Government: other financing - changes

The change in liabilities other than currency and deposits, securities and IMF loans. This item mainly includes the
