**Notice to users**

*Banks and Financial Institutions: Financing and Bank Funding by Sector and Geographical Area* is one of the three new stand-alone specialized publications into which the *Statistical Bulletin* has been gradually split over the course of 2017. The new report will be published quarterly and contains data on the financial and credit system statistical information split by sector and territory. A particular focus is placed on loans granted by the banking system and Cassa Depositi and Prestiti S.p.A. (CDP) to customers, on banks' financial resources collection and securities and derivatives' markets activity and also on customers' assets under management and bonds issues. Other information concerns non-banking financial intermediaries.

A more detailed description of the content of the report and of the sources used is provided in *Banks and Financial Institutions: Financing and Bank Funding by Sector and Geographical Area* in [Methods and Sources: Methodological Notes](#).

With reference to the *Statistical Bulletin* there are new and rearranged information.

There are 51 (of which 32 tables distributed on the online [Statistical Database](#) only) tables, partly deriving from the *Statistical Bulletin's Section B – Information on Banking and Financial Business*, *Section C – Information on Securities Business* and *Section E2 – Deposit Rates*.

In this new publication the previous Statistical Bulletin's tables headings and codes have been modified and a new terminology has been adopted in order to better show the concepts represented while the contents remain unchanged. The definitions have been made similar to those utilized by other statistical publications which describe same phenomena. For information on the conversion between the old coding of the tables previously published in the Statistical Bulletin and the new coding of the tables in this publication see the [Conversion Chart](#).

To facilitate the correct identification and interpretation of the tables, a map of the concepts illustrated in the report may be downloaded using the following [link](#).

## **Notice to readers**

### I. Symbols:

- the phenomenon does not exist, or it exists and data are collected but no cases were recorded
- .... the phenomenon exists but no data are available
- .. the data are known but the value is below the minimum considered significant

== the data are confidential

:: the data are not statistically significant

II. The intervals for the classification by size include the lower limit and exclude the upper limit.

III. The source must be cited in any use or dissemination of the information contained in the publications. The Bank of Italy is not responsible for any errors of interpretation or mistaken conclusions drawn on the basis of the information published.

IV. The row and column totals of some tables may not tally with the sum of the entries because they include data that cannot be allocated.

V. A brief description of the methodology, the main statistical sources and the revisions to methodology concerning the data provided in this report is available in '*Banks and Financial Institutions: Financing and Funding by Sector and Geographical Area*', Bank of Italy, Statistics, [Methods and Sources: Methodological Notes](#).

**Note:** The data refer only to resident customers excluding Monetary and Financial Institutions. The rate of change given here is calculated on the basis of the stocks of the 'loans' aggregate provided in this report. It differs from the simple ratio of the stocks observed in the two periods as it takes account of the following: a) securitized loans and transfers other than securitizations; b) reclassifications; c) value adjustments made during the period; and d) changes in the exchange rate (for further details see the glossary of the report on 'Banks and Financial Institutions: Financing and Funding by Sector and Geographical Area – Methods and Sources: Methodological Notes').

**Note:** The rate is expressed as an annual percentage and calculated as a weighted average of the rates referring to individual transactions outstanding at the end of the reference period, using the corresponding amounts as weights. Only transactions in euros with resident customers are included, limited to the following sectors: non-financial corporations, producer households, consumer households, non-profit institutions and unclassifiable units. The size classes are expressed in euros and do not include the upper bounds of the intervals.
