This publication contains the main findings of the survey on inflation and growth expectations conducted by the Bank of Italy in collaboration with the newspaper Il Sole 24 Ore. The data were collected in March 2013 exclusively for the purpose of economic analysis and have been handled and processed in aggregate form, in full compliance with Italy's law on the treatment of personal information.
The survey report has been prepared by Stefano Iezzi, Sergio Santoro and Raffaele Tartaglia Polcini.
We would like to thank all the companies that agreed to take part.

## SURVEY ON INFLATION AND GROWTH EXPECTATIONS

## 1. Introduction

The interviews for the latest Banca d’Italia - Il Sole 24 Ore quarterly survey on inflation and growth expectations were carried out between 3 and 26 June 2013. A total of 824 companies with 50 or more employees took part, of which 405 operate in industry excluding construction and 419 in services. The survey also polls construction firms ${ }^{1}$ with 50 or more workers; in June 2013 the construction sample consisted of 186 firms (Table A1).

The companies were asked to provide forecasts both on macroeconomic matters, such as the inflation rate and the general state of the productive economy in Italy, and on issues regarding their own business, including their investment plans for the current year. In some cases, the forward-looking opinions are accompanied by backward-looking assessments and, where possible, indications of the factors underlying the reported or expected developments.

The main findings of the survey are summarized below. The appendices contain the methodological notes, detailed statistical tables, and the questionnaire.

## 2. The main findings for firms in industry excluding construction and services

## Inflation expectations in Italy and change in companies' selling prices

In June 2013 inflation expectations for the next six months were revised significantly downwards to 1.5 per cent (from 2.4 per cent in the March survey), in line with the reduction in inflation in the second quarter reported by Istat. Forecasts for 1 and 2 years ahead were also adjusted downwards to 1.6 and 1.7 per cent respectively, from 2.4 per cent for both these years in the last survey (Table 1 and Figure 1).

Businesses reported they had increased their selling prices only slightly over the last twelve months, by 0.1 per cent, more than one percentage point less than expected a year earlier (Table 2 ). For the next twelve months, they forecast a modest upward revision of their price lists, of about 0.5 per cent. Firms' judged that the pressure from the cost of raw materials had slightly eased, while the tendency towards price moderation in response to weak demand was almost unchanged (Table $3)$.

## Assessment of the general economic situation

Firms' assessments of the general economic situation were still negative but less pessimistic in the second quarter of 2013 compared with the previous period. The negative balance between those seeing an improvement and those seeing deterioration declined to -49.9 percentage points from -68.5 points in the March survey (Table 4). In particular, the evaluations of service sector firms were less negative. The average probability assigned to an improvement in the economic situation over the next three months increased slightly although it was still low (at around 10 per cent); among the more export-oriented firms, the proportion reporting zero probability of improvement fell back below 50 per cent (Table 5).

[^0]
## Demand

The proportion of businesses giving a negative assessment of the demand for their products in the second quarter decreased: the negative balance between favourable and unfavourable assessments narrowed to -22 percentage points ( -33 points in the March survey), the least negative balance in the last two years; the improvement was more noticeable among exporting firms (Table 6). The opinions about the outlook for demand in the current quarter also appear less pessimistic: the balance between assessments of an improvement and deterioration was -6.9 percentage points, against -11.9 points in the previous survey (Table 7).

Firms' assessments of the current trend regarding exports of their products in the second quarter of this year were positive, about the same as in March (Table 8). The outlook for the quarter under way remains favourable, although to a lesser degree compared with the previous survey (Table 9).

## Assessment of firms' business conditions

Expectations concerning firms’ business conditions over the next three months improved, although they were still pessimistic. The balance between responses expecting an improvement and expectations of a deterioration came to -17 percentage points, compared with -39 points in March; more than 70 per cent of firms expect conditions to remain unchanged. The expectations of companies in the service sector showed a more pronounced improvement (Table 11 and Figure 6). The negative influence of demand and of credit conditions on business activity is expected to abate somewhat (Table 12).

Looking further ahead (three years), the assessments are more optimistic. There was a continued increase in the number of firms indicating an improvement in their business conditions (61.1 per cent against 57.1 per cent in March), above all in the service sector (Table 13).

## Investment

Investment conditions have become less unfavourable: the negative balance between firms reporting an improvement in the second quarter of 2013 and those reporting a deterioration came to -32 percentage points (against -47.3 points in the March survey; Table 14 and Figure 7), mainly reflecting the less negative opinions of firms in the service sector (Table 14).

There was also an improvement in expectations of investment spending in 2013 overall; the balance between the proportion of firms forecasting an increase and those expecting a contraction went from - 18.9 percentage points in the previous survey to -13.3 points. In the service sector, this balance rose significantly, by about 10 percentage points (Table 15).

Investment spending in the second half 2013 is expected to be similar to that in the first half of the year: the balance between replies forecasting an increase and those expecting a contraction was -2.6 percentage points, and about 50 per cent of the firms expected investment spending to remain constant (Table 16).

## Firms' liquidity and access to credit

Firms' expectations of their liquidity position in the next three months are slightly better than in the March survey: 25.6 per cent expected it to be inadequate (down from 27.2 per cent), while
those considering it more than adequate rose to 13.2 per cent from 12.3 per cent (Table 17). The situation continues to be better for larger firms.

Credit access continues to be difficult. The proportion of firms reporting a deterioration of borrowing conditions came to 26.9 per cent, down slightly from 28.8 per cent in the March survey (Table 18).

## Employment

Expectations for employment in the near term did not improve: the proportion of firms expecting to increase staff in the next three months remained just under 10 per cent, while those expecting their employment to diminish remained around 24 per cent (Table 19).

## 3. Construction firms

As in the March survey, construction firms' opinions of the general economic situation of the country were more unfavourable than those of industrial and service firms: the negative balance between assessments of an improvement and those of a deterioration came to more than 60 percentage points (Table 4); the probability assigned to a more favourable scenario over the next three months was 8 per cent on average (Table 5).

Construction firms reported that the trend of total demand for their work had been less unfavourable in the second quarter than in the first. Some 34.4 per cent of these firms reported a fall in demand ( 49.9 per cent in March), while only 10.1 per cent indicated an increase (up from 7.1 per cent in March; Table 6). Assessments for the present quarter have improved strongly, becoming slightly positive: the balance between forecasts of an increase or a decrease is 0.8 percentage points (compared with -20 points; Table 7). This balance remains negative however (-5.1 percentage points) in the case of firms which earn at least a third of their revenue in residential building.

Expectations of business conditions for construction firms are improving. The balance between the proportion of firms expecting favourable developments in the next three months and those expecting a deterioration came to -19.7 percentage points (compared with -44.8 points in the previous quarter; Table 10). In the next three years 69.7 per cent of construction firms expect better business conditions against 12.5 per cent which forecast worsening conditions (Table 13).

Compared with the March survey, the proportion of firms reporting a deterioration of investment conditions decreased (to 43.1 per cent; Table 14); there is a clear preponderance of expectations of a reduction in investment in 2013 compared with 2012 (Table 15).

As regards employment levels over the next three months, construction firms expect a more pronounced reduction in staff than do firms in the rest of industry and in the services sector (Table 19).

Figure 1

## Expectations of consumer price inflation in Italy

(percentage changes on year-earlier period) ${ }^{(1)}$

(1) The first point in each curve is the latest definitive inflation data available at the time of the survey, which is given to the interviewees in the questionnaire as a point of reference for expressing their expectations; the second point is the average of the interviewees' forecasts for the next six months; the third point is the average of the interviewees' forecasts for the next twelve months; the fourth point is the average of the interviewees' forecasts for the next twenty-four months.

Methodological Notes

## METHODOLOGICAL NOTES

## A1. The sample

The Bank of Italy - Il Sole 24 Ore survey of inflation and growth expectations has been conducted since 1999, interviewing firms in industry excluding construction and in services with 50 or more workers. Starting in the fourth quarter of 2012, the survey has been extended to construction firms with at least 50 workers.

The sample for the second quarter of 2013 consisted of 1,010 firms: 405 firms in industry excluding construction, 419 service firms and 186 construction firms (Table A1).

The sample is stratified, with strata consisting of combinations of economic sector, size of firm (by number of workers) and geographical area. The need to ensure a large enough sample for every type of firm considered relevant means that, in some cases, the number of companies selected is disproportionate to the share of that category in the entire population of firms. This is in particular true of large companies.

Table 1a shows the composition of the sample broken down by number of employees, sector and geographical area.

Table A1
Composition of sample and universe

(1) Istat (2010).

The estimates for inflation expectations 6, 12 and 24 months ahead are calculated on a sub-sample of 543 firms in industry excluding construction or services and 122
construction firms. The rest of the sample was given, on an experimental basis, a differently worded question on inflation expectations in order to assess the impact of the wording on the responses. ${ }^{2}$

## A2. Data collection and estimates

The survey data are collected by a specialist firm which distributes the questionnaire to company managers who are best informed about the topics covered. The respondents usually compile the questionnaire online using a purpose-designed interface. A small number of the companies submit their answers by fax (Table A2).

Table A2
Response rates and data collection via Internet

| Total ......................... | 1,964 | 42.0 | 746 | 24.9 |

(1) Percentage of companies contacted which participated in the survey.

The collected data are subject to an initial quality check so that any mistakes (such as typing errors) can be intercepted and the existence of outliers and missing data (item non-response) can be assessed. Using the correlation between the indicators obtained, the missing data are imputed by means of stochastic regression models, the parameters for which are set after neutralizing the outliers where appropriate.

The aggregates are evaluated using a weighting coefficient for each sample unit which, at the level of the stratification variables, takes into account the ratio between the number of

[^1]respondent companies and the number of companies in the reference universe. In the evaluation of the evolution of the variables attributed to the companies, the weighting also takes account of the size of the participating companies in terms of number of employees in order to provide more accurate indications of expected macroeconomic developments.

In order to verify the impact of outliers on the mean values for the main variables, the standard estimators are accompanied by robust estimators; specifically, values outside the range between the 5th and the 95th percentiles are set at the threshold values of those percentiles. The results are generally in line with those obtained from the total sample (Table A3).

Table A4 contains indicators of the standard errors of the main variables for the total sample.

(1) Companies' opinions regarding the direction and magnitude of the impact of each factor on future selling prices (large/average/small decrease or increase) were scored on a scale of -3 to 3 . A neutral position was assigned a score of 0 . Companies' responses are weighted by the number of employees to account for the impact of size.

(2) OTHER INDUSTRY

- Mineral extraction from mines
- Elettrical, gas, vapour, air conditioning supply
- Water supply
- Sewerage, waste management, and redevelopment
(3) TRADING
(4) OTHER SERVI CES
(5) CONSTRUCTION
- Buildings
- Engineering
- Special construction works (demolition and preparation of building sites, plant installation, completion and finishing, etc.)

Instructions: For percentage changes. indicate the sign in the first box on the left (+ :for increases; -: for decreases).

## SEZI ONE A - GENERAL I NFORMATI ON

A1. Number of employees: |__|
A2. Share of sales revenues coming from exports: $\left.\right|_{-} \mid$
( $1=$ more than $2 / 3 ; 2=$ Between $1 / 3$ and $2 / 3 ; 3=$ Up to $1 / 3$ and more than zero; $4=$ Zero)
SECTI ON B - GENERAL ECONOMIC SITUATI ON OF THE COUNTRY

| $\ldots$ in June |
| :--- | :--- | :--- | :--- |
| $2015 ?$ |

B2. Compared with 3 months ago, do you consider Italy's general economic situation is ...? $\square$ Better $\square$ The same $\square$ Worse
B3. What do you think is the probability of an improvement in Italy's general economic situation in the next 3 months?
$\square$ Zero $\square_{1-25}$ per cent $\square$ 26-50 per cent $\square$ 51-75 per cent $\square 76$-99 per cent $\square 100$ per cent

## SECTION C - Your firm's business conditions

C1. Do you think your firm's current business conditions are:
$\square$ very positive $\square$ positive $\square$ Neither positive nor negative $\square$ Negative $\square$ very negative
How do you think business conditions for your company will be:
C2 in the next $\mathbf{3}$ months? $\square$ Much better $\square$ Better $\square$ The same $\square$ worse $\square$ Much worse
C3. in the next $\mathbf{3}$ years? $\square$ Much better $\square$ Better $\square$ The same $\square$ worse $\square$ much worse
For each of the above forecasts imagine there are 100 points available; distribute them among the possible forecasts according to the probability assigned to each one. How do you think business conditions for your company will be:

|  | Better |  |  | The same |  |  | Worse |  |  | Total |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: | :---: | :---: | :---: |
| C4. in the next $\mathbf{3}$ months |  |  |  |  |  |  |  |  |  | $\mathbf{1}$ | $\mathbf{0}$ | $\mathbf{0}$ |
| C5. in the next $\mathbf{3}$ years |  |  |  |  |  |  |  |  |  | $\mathbf{1}$ | $\mathbf{0}$ | $\mathbf{0}$ |

Please indicate whether and with what intensity the following FACTORS will affect your firm's business in the next 3 months.
Factors affecting your firm's business In the next 3 months
C6. changes in DEMAND
C7. changes in YOUR PRICES
C8. AVAILABILITY and the COST of CREDIT

| Effect on business |  |
| :---: | :---: |
| Negative | Nil |

C9. Compared with 3 month ago, do you think conditions for investment are ... ?
Intensity (if not nil)

C10. What do you think your liquidity situation will be in the next 3 months, given the expected change in the conditions of access to credit? $\square$ Insufficient $\square$ sufficient $\square$ More than sufficient
C11. Compared with three months ago, is the total demand for your products ... ? $\square$ Higher $\square$ Unchanged $\square$ Lower
C12. How will the total demand for your products vary in the next 3 months? $\square$ Increase $\square$ No change $\square$ Decrease
(Answer to questions C13-C14 only if the share of sales revenues coming from exports is positive, otherwise go to C15)
C13. Compared with three months ago, is the foreign demand for your products ... ? $\square$ Higher $\square$ Unchanged $\square$ Lower C14. How will the foreign demand for your products vary in the next 3 months? $\square$ Increase $\square$ No change $\square$ Decrease C15. Compared with three months ago, are credit conditions for your company ...? $\square$ Better $\square$ Unchanged $\square$ worse
SECTI ON D - Changes in your firm's selling prices
D1. In the last 12 months, what has been the average change in your firm's prices?
|__| |__ا__|•|_-|\%
D2. For the next 12 months, what do you expect will be the average change in your firm's prices?

| Please indicate direction and intensity of the following $\operatorname{FACTORS}$ as they will affect your firm's selling prices in the next 12 months: |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Factors affecting your firm's prices |
| in the next 12 months |

D4. RAW MATERIALS PRICES
D5. LABOUR COSTS
D6. PRICING POLICIES of your firm's main competitors

| $1_{\text {__ }}$ \| | ${ }^{21}$ __ 1 | $\left.3\right\|_{\text {__ }}$ \| | ${ }^{1}$ __\| | ${ }^{2}$ __\| | 3\|__| |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1\|__| | $\left.2\right\|_{\text {__ }}$ | $\left.3\right\|_{\text {__ }}$ \| | ${ }^{1}$ __\| | $\left.2\right\|_{\text {__ }}$ | $3{ }^{3}$ __ |
| 1\|_-_ | $2 \mid$ | $\left.3\right\|_{\text {_- }}$ \| | $\left.1\right\|_{\text {_- }} \mid$ | $2\|\ldots\|$ | $\left.3\right\|_{\text {__ }}$ \| |

## SECTION E - WORKFORCE

E1. Your firm's total number of employees in the next 3 months will be:

| Lower | Unchanged | Higher |
| :---: | :---: | :---: |
| $\left.1\right\|_{-\_} \mid$ | $\left.2\right\|_{-\_} \mid$ | $\left.3\right\|_{-\_} \mid$ |

## SEZI ONE F - I NVESTMENT

F1. What do you expect will be the nominal expenditure on (tangible and intangible) fixed investment in 2013 compared with that in 2012? $\square_{\text {Much higher }} \square_{\text {A little higher }} \square_{\text {About the same }} \square_{\text {A little lower }} \square_{\text {Much lower }}$
F2. And what do you expect will be the nominal expenditure in the second half of 2013 compared with that in the first half of 2013 : $\square$ Much higher $\square_{\text {A little higher }}^{\square} \square_{\text {About the same }} \square_{\text {A little lower }} \square_{\text {Much lower }}$
nOTE: The responses "much higher" and "much lower" also apply when, in the two periods compared, investments are zero.

## Construction

Instructions: For percentage changes. indicate the sign in the first box on the left (+ : for increases; -: for decreases).

## SEZI ONE A - GENERAL I NFORMATI ON

A1. Number of employees: |__|
A2. Share of sales revenues coming from exports: |__|
( $1=$ more than $2 / 3 ; 2=$ Between $1 / 3$ and $2 / 3 ; 3=U p$ to $1 / 3$ and more than zero; $4=Z e r o$ )

A3. Share of revenue from residential building: |__|
$(1=$ more than $2 / 3 ; 2=$ Between $1 / 3$ and $2 / 3 ; 3=$ Up to $1 / 3$ and more than zero; $4=$ Zero $)$

| 1\|__| | 2\|__| | $3\|\ldots\|$ | $\left.1\right\|_{\text {__ }} \mid$ | 2\|__| | $3\|\ldots\|$ |
| $\left.1\right\|_{-\_} \mid$ | 2\|__| | $3\|\ldots\|$ | $\left.1\right\|_{\text {__ }} \mid$ | 2\|__| | $3\|\ldots\|$ |

C9. Compared with 3 month ago, do you think conditions for investment are ... ? Better $\square$ The same $\square$ Worse
C10. What do you think your liquidity situation will be in the next 3 months, given the expected change in the conditions of access to credit? $\square$ Insufficient $\square$ Sufficient $\square$ More than sufficient
C11. Compared with three months ago, is the total demand for your works ... ? $\square$ Higher $\square$ Unchanged $\square$ Lower
C12. How will the total demand for your works vary in the next 3 months? $\square$ Increase $\square$ No change $\square$ Decrease
(Answer to questions C13-C14 only if the share of revenue from residential building is positive, otherwise go to C15)
C13. How has demand for your residential building works changed compared with 3 months ago? $\square$ Higher $\square$ Unchanged $\square$ Lower
C14. How will demand for your residential building works change in the next 3 months? $\square$ Increase $\square$ No change $\square$ Decrease
C15. Compared with three months ago, are credit conditions for your company ...? $\square$ Better $\square$ Unchanged $\square$ Worse
SECTI ON D - CHANGES IN YOUR FIRM'S SELLING PRICES
D1. In the last 12 months, what has been the average change in your firm's prices?
|__| |__|__|.|__|\%

D2. For the next 12 months, what do you expect will be the average change in your firm's prices?
|__| |__|__|•|__|\%
Please indicate direction and intensity of the following factors as they will affect your firm's selling prices in the next 12 months:

| Factors affecting your firm's prices in the next 12 months | Effect on firm's selling prices |  |  | Intensity (if not nil) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Downward | Neutral | Upward | Low | Average | High |
| D3. TOTAL DEMAND | 1\|__| | $\left.2\right\|_{\text {__I }}$ | $3{ }^{1}$ __\| | 1\|__| | $2{ }^{2} \ldots$ | $3{ }^{\text {\|__\| }}$ |
| D4. RAW MATERIALS PRICES | ${ }^{1}$ __\| | 2\|__1 | 31 __1 | ${ }^{1}$ __\| | $21_{\text {__ }}$ | $31 . \_\mid$ |
| D5. LABOUR COSTS | ${ }^{1}$ __\| | 21__\| | 31 __1 | 1\|__| | $21_{\text {__ }}$ \| | $\left.3\right\|_{\text {__ }}$ \| |
| D6. PRICING POLICIES of your firm's main competitors | $\left.1\right\|_{\text {_- }}$ \| | 2\|__1 | $\left.3\right\|_{\text {__ }}$ \| | 1\|__| | $2 \mid \ldots 1$ | $\left.3\right\|_{\text {__ }}$ \| |
| SECTI ON E - Workforce |  |  |  |  |  |  |
| E1. Your firm's total number of employees in the next 3 months will be: |  |  |  | Lower | Unchanged | Higher |
|  |  |  |  | 1\|__| | $\left.2\right\|_{\text {__- }}$ | $3]_{\text {__ }}$ \| |

## SEZI ONE F - I NVESTMENT

F1. What do you expect will be the nominal expenditure on (tangible and intangible) fixed investment in 2013 compared with that in 2012? $\square_{\text {Much higher }} \square_{\text {A little higher }} \square_{\text {About the same }} \square_{A}$ little lower $\square$ Much lower
F2. And what do you expect will be the nominal expenditure in the second half of 2013 compared with that in the first half of 2013: $\square$ Much higher $\square$ A little higher $\square_{\text {About the same }} \square_{\text {A little lower }} \square$ Much lower

NOTE: The responses "much higher" and "much lower" also apply when, in the two periods compared, investments are zero.

## GENERAL INFORMATION

I - Unless indicated otherwise. figures have been computed by the Bank of Italy.
II - Symbols and Conventions:

- the phenomenon in question does not occur;
.... the phenomenon occurs but its value is not known;
.. the value is known but is nil or less than half the final digit shown.
Figures in parentheses in roman type () are provisional. those in parentheses in italics () are estimated.

III - The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the database in the electronic archive in which information to be released to the public is held. A similar code identifies the different aggregates shown in each table.

IV - The methodological notes in the last part of the Supplement are identified by electronic codes that refer to the tables and. within each table. to the individual aggregates. Notes that refer to a single observation are also identified by the date of that observation.

## SUPPLEMENTS TO THE STATISTICAL BULLETIN

[^4][^5]
[^0]:    ${ }^{1}$ According to the ATECO classification of economic activities, Industry includes construction, but Industria in senso stretto (industry narrowly defined) does not. To simplify, in the rest of the text the term 'industrial firms' will be used to denote firms belonging to the category Industria in senso stretto.

[^1]:    ${ }^{2}$ Specifically, these firms were asked to give their inflation expectations without informing them of Istat's latest release on inflation in Italy and the euro area. The results of the experiment will be described in a forthcoming edition of the survey.

[^2]:    (1) Companies' responses are weighted by the number of employees to account for the impact of size.
    (2) Values outside the range between the 5th and the 95th percentiles have been set at the threshold values of thosepercentiles.

[^3]:    (1) For firms in industry excluding construction and services, products; for construction firms, works.

[^4]:    Money and Banking (monthly)
    The Financial Market (monthly)
    The Public Finances. borrowing requirement and debt (monthly)
    Balance of Payments and International Investment Position (monthly)
    Financial Accounts (quarterly)
    Payment System (half yearly)
    Public Finance Statistics in the European Union (annual)
    Local Government Debt (annual)
    Household Wealth in Italy (annual)
    Sample Surveys (irregular)
    Methodological Notes (irregular)
    All the supplements are available on the Bank of Italy's site (www.bancaditalia.it).
