Figure 1

In December resident sectors recorded net bond issues of €4.2 billion. Net general government bond issues were positive at €1.2 billion, an outcome to which BTPs contributed positively (€11.6 billion) while CCTs, BOTs, local government securities and international securities contributed negatively (€7.2, €2.9, €0.2 and €0.1 billion, respectively). Banks recorded net issues of €0.2 billion. The net issues of the remaining sectors were positive at €2.8 billion, with other financial intermediaries, non-financial corporations and insurance corporations contributing €1, €1.9 and -€0.1 billion, respectively.

Figure 2

In January gross yields to maturity on 3-year and 10-year benchmark BTPs decreased both by 1 basis point, while that one on 30-year increased by 3 basis points, to 3, 3.81 and 4.44 per cent, respectively. The gross yield on benchmark CCTs decreased by 5 basis points to 5.43 per cent.

## **Notice to readers**

Following the suspension of CTZ issuances by the Ministry of Economy and Finance as of March 2021, since the October 2022 publication the information about CTZs are dropped from Table 1 “Securities issued by residents”, Table 2 “Government securities: gross yields at issue by sector and maturity”, Table 3 “Government securities listed on Borsa Italiana (MOT): yields to maturity, turnover and outstanding amounts”, Table 4 “Government securities listed on MTS: turnover”, Table 5 “Government securities listed on MTS: average residual maturity and duration”, and Table 6 “Benchmark government securities: gross yields to maturity”. Beside the suspension of issuance, series are no longer published due to the progressive reimbursement and depletion of the stock of CTZs in circulation. Time series will nonetheless continue to be published in the online Statistical Database.

Starting from the publication of November 2022, the “[Methods and Sources: Methodological Notes](#)” is printed separately in replacement of the “Notes to the tables” previously reported at the end of the monthly publication. With respect to the previous “Notes to the tables”, the “Methods and Sources: Methodological Notes” provides in a more detailed form the definitions and describes the sources, the methodologies and the revision policies regarding the statistics published in the monthly report “The Financial market”.

From the publication of June 2023, data on securities issued by residents (table [VALM0100](#)) are compiled, starting from the reference date January 2022, following the principles of the new ECB guideline [2022/971](#). Published data are obtained from ECB Securities Issues Statistics ([CSEC](#)) whose source is the Centralized Securities Database (CSDB). Some details published in the table that can not be obtained from the new source continue to be compiled from the national Securities Register managed by the Bank of Italy. For the details see the [“Methods and Sources: Methodological Notes”](#).

## **General information**

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
  - the phenomenon does not occur;
  - .... the phenomenon occurs but its value is not known;
  - .. the value is known but is nil or less than half the final digit shown.
- Figures in parentheses in roman type () are provisional. Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the electronic database holding the information to be released to the public. A similar code identifies the different aggregates shown in each table.
