Notice to readers

'Banks and Money: National Data' replaces the previous statistical report 'Money and Banking'. It continues to be issued monthly and to include aggregated national data on the banking system, which for the most part follow the Eurosystem's harmonized definitions.

The publication comprises 40 tables and is divided into three sections.

Section 1. Banking statistics: balance sheets and other information

Section 2. Bank interest rates

Section 3. Single monetary policy statistics: the Italian components

The [Methods and Sources: Methodological Notes](#) is printed separately but forms an integral part of the publication and describes its content.

The publication introduces several new features relative to banks' balance sheets and interest rates on loans.

- o There is more information on bank counterparty sectors and bank funding and there are separate statistics on intra-group interbank loans: Tables 1.2, 1.3, 1.5 and 1.6.
- o There is a longer time series on loans and bad loans by branch of economic activity in line with the current classification (Ateco 2007/NACE Rev. 2): Tables 1.9 and 1.16.
- o New statistics on one-month percentage changes on an annual basis of loans, security holdings and deposits are published, calculated using the Eurosystem's common methodology: Tables 1.13 and 1.14.
- o In addition to data on outstanding amounts, data on monthly flows of loans, deposits, bad loans and securitizations and other loan sales are published: Tables 1.4, 1.7, 1.12 and 1.15.
- o Some composite indicators of the cost of bank loans in Italy for households and non-financial corporations are introduced: Table 2.1.
- o Statistics on new pure loans net of renegotiations are published, for both the loan volumes and rates applied: Tables 2.2, 2.3, 2.4 and 2.5.

General information

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
 - the phenomenon in question does not occur;
 - the phenomenon occurs but its value is not known;
 - .. the value is known but is nil or less than half the final digit shown.

Figures in parentheses in roman type () are provisional, Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the database in the electronic archive in which information to be released to the public is held, a similar code identifies the different aggregates shown in each table.
