

Banks and money: national data

10 November 2020

For further information: statistiche@bancaditalia.it
www.bancaditalia.it/statistiche/index.html

Figure 1

Figure 2

In September lending to the private sector, adjusted to take account of securitizations and other loans transferred and derecognized from banks' balance sheets, grew by 3.8 per cent on an annual basis (against 3.6 in August). Lending to households increased by 2.0 per cent on the same period of 2019 (against 1.9 in August), while that to non-financial corporations increased by 6.8 per cent (against 6.0 per cent in the previous month). Private sector deposits rose by 8.3 per cent on an annual basis (against 7.1 per cent in August); bond funding growth rate decreased by 5.9 per cent (against -6.3 in August). Bad debts fell by 14.2 per cent on an annual basis (-14.7 per cent in the previous month); the variation can be affected by securitization operations.

Figure 3

Figure 4

The interest rates on loans granted during the reference month to households for house purchase, including ancillary costs, came to 1.61 per cent (against 1.67 per cent in August), whereas those on new consumer loans came to 7.89 per cent (against 7.82 in the previous month). Interest rates on new lending to non-financial corporations amounted to 1.31 per cent (against 1.15 in the previous month); those on new loans of up to €1 million were equal to 1.71 per cent, while the rates on new loans of above that amount were equal to 0.98 per cent. Rates on the outstanding amount of deposits were equal to 0.33 per cent (against 0.34 in August).

Notice to readers

'Banks and Money: National Data' is issued monthly and includes aggregated national data on the banking system, which for the most part follow the Eurosystem's harmonized definitions.

The publication comprises 40 tables and is divided into three sections.

Section 1. Banking statistics: balance sheets and other information

Section 2. Bank interest rates

Section 3. Single monetary policy statistics: the Italian components

The [Methods and Sources: Methodological Notes](#) is printed separately but forms an integral part of the publication and describes its content.

Since January 2019, due to the entry into force of the international accounting standard IFRS 16, the items "fixed assets" on the assets side and "deposits with agreed maturity" on the liabilities side include the value of the operational lease assets. The gradual implementation of IFRS 16 in banking statistics by the reporting agents has affected the time series in the early months of the year. For more information see the separate dossier [Methods and Sources: Methodological Notes](#).

Since September 2019, due to the depletion of the volumes traded on the interbank deposit electronic market (e-MID), the three time series relating to overnight, 1-month and 3-month interbank interest rates, for which the source is the interbank deposit electronic market (e-MID), have been dropped from Table 2.9 "Other bank and interbank interest rates". The time series of interbank interest rates collected up to December 2019 can be consulted in the online Statistical Database.

Since June 2020, own securities issued involved in repo operations with other MFIs are no longer included in the instrument "securities issued" but in the "interbank deposits".

General information

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
 - the phenomenon does not occur;
 - the phenomenon occurs but its value is not known;
 - .. the value is known but is nil or less than half the final digit shown.

Figures in parentheses in roman type () are provisional. Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the electronic database holding the information to be released to the public. A similar code identifies the different aggregates shown in each table.
