

# Banks and money: national data

10 May 2022

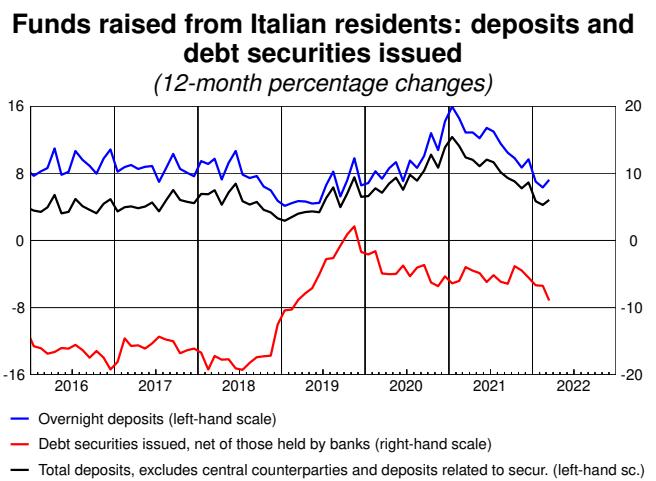

For further information: [statistiche@bancaitalia.it](mailto:statistiche@bancaitalia.it)  
[www.bancaditalia.it/statistiche/index.html](http://www.bancaditalia.it/statistiche/index.html)

**Figure 1**

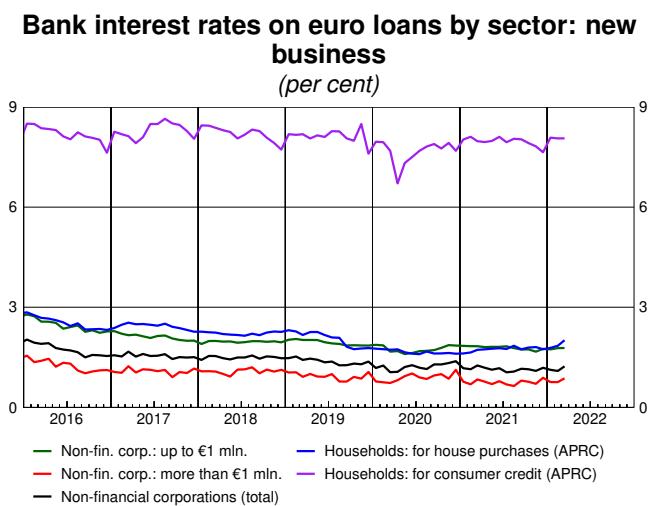

In March lending to the private sector, adjusted in line with the European System of Central Banks (ESCB) harmonised methodology, grew by 2.5 per cent on an annual basis (against 2.0 in February). Lending to households increased by 4.0 per cent on an annual basis (3.8 in February), while that to non-financial corporations increased by 1.3 per cent (against 1.2 per cent in the previous month). Private sector deposits rose by 4.8 per cent on an annual basis (against 4.2 per cent in February); bond funding growth rate decreased by 8.9 per cent (against -6.7 in February).

**Figure 2**

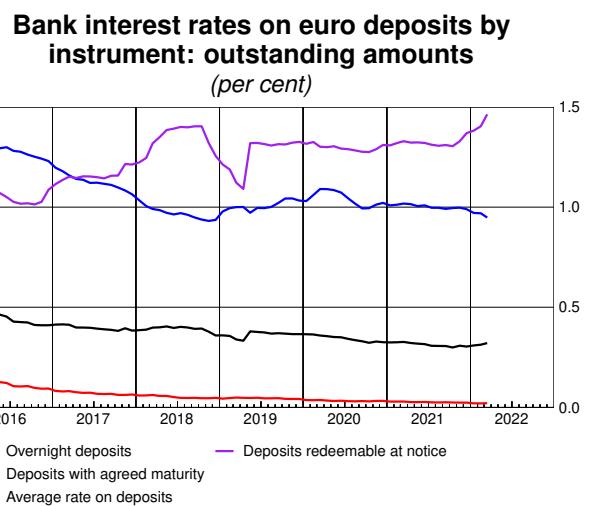

**Figure 3**

The interest rates on loans granted during the reference month to households for house purchase including ancillary costs (Annual Percentage Rate of Charge, APRC) came to 2.01 per cent (against 1.85 in February), whereas those on new consumer loans came to 8.06 per cent (same as in the previous month). Interest rates on new lending to non-financial corporations amounted to 1.23 per cent (against 1.09 in the previous month); those on new loans of up to €1 million were equal to 1.78 per cent, while the rates on new loans of above that amount were equal to 0.87 per cent. Rates on the outstanding amount of deposits were equal to 0.32 per cent (0.31 in February).

**Figure 4**

Reference period: March 2022

## Notice to readers

'Banks and Money: National Data' is issued monthly and includes aggregated national data on the banking system, which for the most part follow the Eurosystem's harmonized definitions.

The publication comprises 40 tables and is divided into three sections.

Section 1. Banking statistics: balance sheets and other information

Section 2. Bank interest rates

Section 3. Single monetary policy statistics: the Italian components

The [Methods and Sources: Methodological Notes](#) is printed separately but forms an integral part of the publication and describes its content.

Since June 2020, own securities issued involved in repo operations with other MFIs are no longer included in the instrument "securities issued" but in the "interbank deposits".

Since November 2020, due to new clarifications related to Eurosystem harmonized statistics, the value of debts relating to operating leases is included in the item "Other liabilities" instead of in the item "Deposits with agreed maturity", partially deviating from IFRS 16.

Starting from January 2022, with the beginning of the reporting of the revised [Regulation \(EU\) 2021/379](#) concerning Balance Sheet Items of the Monetary Financial Institutions, the computation of the 12-month percentage changes has been innovated embedding revisions in line with the European System of Central Banks harmonized adjustment methodology. In more detail, outstanding amounts, used in the calculation of percentage changes, include also securitized loans derecognized managed by banking servicers and other derecognized loans serviced by the bank originator. In addition, acquired loans (including bad loans) are reported at the nominal value instead of the acquisition value.

Starting from January 2022 two new tables, available only in the Statistical Database (SDB), have been introduced:

- BSIB1010:Banks: main assets – reference series for the calculation of the percentage changes;
- BSIB1110: Banks: main liabilities – reference series for the calculation of the percentage changes.

These tables give users all the components for the calculation of the percentage changes published in tables BSIB1000 e BSIB1100. Please notice that, in these last two tables, the descriptions of the variables have been updated, while SDB codes remain unchanged (a bridging table between the new and the previous descriptions is available at this [link](#)).

Since March 2022, the corporations responsible for money market funds management allow data dissemination even in presence of confidentiality issues due to the limited number of the reporting agents. Therefore the time series in Tables 1.1, 1.2, 1.6, 1.17, marked by an asterisk in publications from September 2021 to February 2022, consider now only banking data.

## **General information**

- I Unless indicated otherwise, figures have been computed by the Bank of Italy.
- II Symbols and Conventions:
  - the phenomenon does not occur;
  - .... the phenomenon occurs but its value is not known;
  - .. the value is known but is nil or less than half the final digit shown.
- Figures in parentheses in roman type () are provisional. Those in parentheses in italics () are estimated.
- III The tables are identified both by a number and by an alphanumeric code that defines the content of the table in the electronic database holding the information to be released to the public. A similar code identifies the different aggregates shown in each table.
